

The Weatherization Leveraged Partnerships Project

The table below represents the result of collaboration between National Association for Community Services Programs (NASCSP) and the Weatherization Leveraged Partnerships Project, a joint initiative of Economic Opportunity Studies and the Community Action Partnership. It shows the most complete available picture of non-federal funding that subgrantees used to deliver services in eligible homes in coordination with the Department of Energy Weatherization Assistance Program.

The Weatherization Leveraged Partnerships Project interviewed WAP subgrantees, utilities, Community Action Associations, and other local sources, while NASCSP surveyed State WAP managers. The combined studies show that Weatherization delivery organizations collectively 'leveraged' just over \$358.6 million of "other", i.e. non-federal, funds to use with federal funding from WAP and HHS LIHEAP when upgrading eligible homes, or \$1.62 in non-federal funds for every \$1 of DOE funds spent.

The table also shows there is wide variation among state WAP networks' ability to attract such funding. While many states leverage many million dollars each year, and 39 states reported at least some funds, in 11 states and DC there are no non-federal funds in the program.

The Weatherization Leveraged Partnerships Project is a joint initiative between Community Action Partnership and Economic Opportunity Studies. Our goal is to offer training and assistance to WAP subgrantees and their Associations in designing private partnerships and programs that leverage their local WAP expertise. We are available to assist your local Weatherization Network in getting started with leveraging or responding to challenges in current partnerships.
