This training material was created in collaboration with the Association for Nationally Certified ROMA Trainers (ANCRT) and the Community Action Partnership (Partnership).

This publication was created by National Association of Community Action Agencies - Community Action Partnership in the performance of the U.S. Department of Human Services, Administration for Children and Families, Office of Community Services Grant Number 90ET0465.

Any opinion, findings, and conclusions, or recommendations expressed in this material are those of the authors and do not necessarily reflect the views of the U.S. Department of Health and Human Services, Administration for Children and Families.

Introduction

Implementing the Full ROMA Cycle is the final training module within a series based on material produced by the Community Action Partnership and the Association of Nationally Certified ROMA Trainers (ANCRT). The series is comprised of a variety of recorded webinars, workshop PowerPoints, facilitator guides, case study examples, and associated resources. The curriculum is based on foundational ROMA principles and practices, exploring the focus areas for ROMA Next Generation and highlighting how all the elements of the Performance Management Framework fit together. Topics within the series are depicted below:

ROMA Next Generation Training Series

Learning Objectives for the Series

At the end of this series, participants will be able to define the elements of ROMA and ROMA Next Generation, and will understand the concepts that will help your agency and the entire CSBG network increase their performance measurement and management capacity so that the National Goals are accomplished.

By the end of the series participants are expected to be able to:

- Recall and describe the basic elements of the Results Oriented Management and Accountability (ROMA) principles and practices
- Explain the new focus on ROMA Next Generation:
 - Describe the role of a “Theory of Change” throughout the ROMA Cycle
 - Identify key elements of community level work
 - Describe the inter-relationships between family, agency and community level changes
 - Identify data collection processes and procedures that are needed for data analysis
 - Explain the role that data analysis plays in the ROMA Cycle
 - Identify key data analysis techniques and how analysis can be used for improvement
- Discuss how all the elements of the Performance Management Framework work together

Implementing the Full ROMA Cycle Module Description

This module is designed to support a local Community Action Agency in identifying its current application of the full ROMA cycle, considering how improvements can be made to agency practices, and establishing a plan to positively impact the agency's capacity.

The *Implementing the Full ROMA Cycle Module* consists of the "Implementing ROMA" introductory recorded webinar, a case study example, and an in-person four to six hour workshop session that uses this facilitator guide and the accompanying power points. The introductory webinar can be accessed [HERE](#) and should be shared with all workshop invitees at least two weeks before the in-person session.

This material is adaptable to the needs of the agency. When considering using this material, we suggest your training team review all of the activities and additional material available from the other modules in this series and decide how they can be best used to meet the agency goals.

The module has an overview of several kinds of activities that can take place outside of the actual training. The facilitation of this module may be done over more than one in-person session because of the nature of the organizational culture assessment and the ROMA Audit. Those assessments may require that the training participants take time to talk to other people in the agency, consider how various parts of the agency are applying different concepts, and generally get more information than they might have available when starting this module initially.

Additionally, there are many places within this module where the local agency may want to include other modules in this series or another related topic to help them establish an Impact Pathway Plan.

For example, as they discuss and consider the Assessment and Planning phases of the ROMA Cycle, agency staff may find a disconnect between what they see in their Community Needs Assessment (CNA) and the activities included in their Strategic Plan. They may find that this is an opportunity to use other training material in this series to help them evaluate the quality and completeness of their CNA. Such an evaluation may reveal places that the agency wishes to 'dig deeper' into the data that they have collected in order to further understand their community and identify areas of need. When staff question the identification of needs that have been the basis of their understanding of their community, they may elect to pause in this module to use the training materials available, related to both the CNA and to Strategic Planning. Then they can come back to comparing CNA with Strategic Plan at a later meeting.

Additionally, as staff considers the value of creation of a Local TOC, they may want to be sure everyone has a full understanding of what a TOC is and how it can be used. Or perhaps this is an opportunity to stop and use the ROMA NG training material or Board presentation. Understanding the importance of Community Level work can be enhanced with the same titled module from this series. Finally, staff may determine that they could use additional time to explore and increase understanding of the issues related to data collection, analysis and use of data in decision making – which can be assisted by other modules in this series.

Implementing the Full ROMA Cycle Module Learning Objectives

Participants will:

- Understand basic principles of a results orientation and performance management
 - Clarify how ROMA fits into the Performance Management Framework
- Acknowledge that we start this capacity building project with assessment to determine a baseline
 - Understand your Organizational Culture
 - Identify current ROMA implementation
- Identify elements of an Impact Pathway Plan
 - Prepare to create a Local Theory of Change
 - Create action steps in your pathway toward impact
- Prepare for monitoring progress and identifying success
 - Establish a time table for follow up

Overview

Intended Audience:

Community Action Agency directors, managers, staff, board members, customers, and volunteers.

Workshop Prerequisites:

All participants should have watched the [“Implementing ROMA” Introductory Recorded webinar](#) prior to attending this workshop

Workshop Goal:

Participants will create a plan to Impact the Implementation of ROMA in their agency, based on a clear understanding of current situation and what needs to be strengthened or changed.

Workshop Length:

4 to 6 hours, which can be broken up into multiple 1 to 1.5 hour sessions.

Trainer Requirements: Nationally Certified ROMA Trainer (NCRT), Nationally Certified ROMA Implementer (NCRI), or other experienced facilitator with understanding of ROMA.

Materials Needed:

Implementing ROMA PowerPoint, ROMA Cycle poster

Computer, projector, screen, flip chart, markers, tape, blank paper, nametags and/or table tents, handouts (listed below)

Agency documents: Mission Statement, Community Needs Assessment, Strategic Plan, Community Action Plan, other funding proposals, agency Reports (can be Annual CSBG Report, monthly reports the

agency uses for management, reports required for other funding sources, etc.), organizational chart of the agency, list of funding sources, most recent agency outreach publications

Handouts Needed:

Sign-in sheet, evaluation

National TOC, blank Local TOC, ROMA Audit Checklist, Guide to Data Policy Development, Assessing Your Reports, Organizational Culture Assessment, Are You Results Oriented, ROMA Culture Building Blocks, Impact Pathways Plan blank, Flow Chart blank

Note: It may be useful to have copies of the Local theory of change created by the Economic Security Corporation (ESC) to demonstrate one agency example

Number of Participants Recommended:

A good size workshop is between 8 and 25 individuals, which is a big range. But the number you will recruit for this workshop depends on your agency structure. You should have administrative staff, department leaders, and representative from the Board of Directors. You would not want to spend the full workshop time without key individuals who will be doing the work of supporting a ROMA Culture. And you would not want to have so many people involved that consensus will be hard to build.

Room Set-Up: u-shaped or half-rounds to facilitate group activities.

Evaluation: Completed Impact Pathways Plan, Learner Centered Feedback end of session evaluation

Implementing the Full ROMA Cycle, Module Outline

SECTION	CONTENT	DELIVERY METHOD	TIME*	SLIDE #	MATERIALS NEEDED
		<i>*Times are approximate – it is likely that your group will take longer to discuss and process these concepts</i>			
Pre session	Reminder before session:	View recorded webinar suggest put title of webinar here	15		Computer to watch recorded webinar
Opening	Arrival- Sign in				Sign in sheet, name tents (tags)
	Welcome and Introductions	Facilitator led, participants respond	15 min		
	Identify this as a part of a ROMA Training series – Learning objectives for this training	Get any comments on the pre session recorded webinar	5 min	1-3	
Part I	Setting the Context	Lecture	20 min	4-11, 13 -21, 24-27	
A	National Theory of Change	Quick check in with participants -- Ask if people know about TOC and Logic Models.		12	National TOC handout (from slide 16)
		How well does the AGENCY operate? What difference does the AGENCY make?		18	Write 2 questions on flip chart and post
		Participants identify the connects they see between services they deliver and outcomes achieved	5 min	22	Take notes on flip chart
B	Mission Statement	Participants consider their mission statement What are “assumptions”?	5 min	23	Agency’s mission statement
C	Local Theory of Change	Get participants to respond “are they		28, 29	Have local TOC blank as handout

		willing to try something new?"			
Part II	Assessment	Lecture/discussion	20 min	30-32, 34-35	
				33	ROMA Audit as handout
	<i>Optional (if time) Can also be assigned as "homework"</i>	<i>Show Case Study</i>	<i>20 min</i>	36	<i>Case Study Recorded webinar</i>
		Review the elements of the Case Study, Point out that the ROMA Audit ESC used had many more columns, because those were items they wanted to know about.		36 - 41	ESC local TOC
A	Elements of ROMA Cycle			42	Refer to ROMA Cycle poster
	Assessment, Planning, Implementing, Reporting	Small group activity for each of the elements of the ROMA Cycle	10 min each = 40 min	43-47	
	Collecting Data	Guided discussion about how (when where, by whom) data is collected	10 min	48	Handout: guide to data policy development
	Considering your Reports	Guided discussion about agency reports	10 min	49	Handout: Assessing Your Reports
	Analysis	Small group for the last of the cycle elements	10 min	50	Refer to ROMA Cycle
	Use of Data	Discuss example of some items identified to help improve use of data	5 min	51	
	Reassessment, planning	Small group, "How will you monitor change?"	10 min	52, 53	Show the cycle continues; how will you monitor change?
B	Organizational Culture	Introduction to concepts	10 min	54 -60, 62, 63, 70	
		Why things are done this way....	3 min	61	Video on web
		Small group, "What can you answer from memory?"	20 min	64, 65	Handout: Assessing Organizational Culture

		Small group, “Is agency perspective different from staff perspective?”		66, 68	Handout: Are You Results Oriented
C	Performance Management Framework	Reviewing all the elements	5 min	69	
Part III	Impact Pathways Plan	Introduction to concepts	5 min	71 -73	
A	Scale Up	Discussion	15 min	74 -76	
	Moving to a ROMA Culture	Introduction		77 – 80. 90	
		Small group discussion about each of the building blocks	15 min	81 -89	Handout ROMA Culture Building Blocks
B	Scale Out	Introduction to concepts	15 min	91 – 94	
		Personal power, Influence, your role		95-99	
C	Create a Plan	Introduction to concepts, example	20 min	100 - 107, 109, 110	
				108, 112	Blank Plan and Flow Chart
		Participants generate ideas for Impact targets, and possible pathways		111,	Post ideas on flip chart
D	Observe and Measure Results		10 min	113 – 116	
	Using a Score Card			117	
Closing	Wrap Up		5 min	118 - 121	
	Resources, Contacts			122 - 125	
		Collect from participants			Evaluations
<i>Total time identified here is 280 minutes – just under 5 hours.</i>

Using the Performance
Management
Framework

Helping People. Changing Lives.
**community
Action**
PARTNERSHIP
AMERICA'S POVERTY FIGHTING NETWORK

Learning Objectives

- Understand basic principles of a results orientation and performance management
 - Clarify how ROMA fits into the Performance Management Framework
- Acknowledge that we start with assessment
 - Understand your Organizational Culture
 - Identify current ROMA implementation
- Identify elements of an Impact Pathway Plan
 - Prepare to create a Local Theory of Change
 - Create action steps in your pathway toward impact
- Prepare for monitoring progress and identifying success

This is part of the work we are doing together to find ways for the network to move up to the new OCS Performance management Framework

The issue is that so many new ideas are being implemented at the same time that we have to make the most effective use of time and resources.

So this is about how to help move the agency's thinking and culture and activities towards a Results (or Performance) Orientation so that all the pieces work together.

SETTING THE CONTEXT

Part I

The logo for Action Partnership, featuring a stylized red and blue icon to the left of the text. The text includes the tagline "Working People Changing Lives" at the top, "Action" in a large blue font, "PARTNERSHIP" in a smaller blue font below it, and "WORKING PEOPLE CHANGING LIVES" in a small red font at the bottom.

**CSBG Performance
Management Framework**

- Involves an inclusive, multi-pronged approach to the purposes of the CSBG act
- Provides accountability at 3 levels (local, state, federal) of the CSBG network
- Ensures efficiency and effectiveness
- Demonstrates stronger results for individuals, families and communities with low-income nationwide

The logo for Community Action Partnership is located in the bottom right corner of the slide. It features a red heart icon to the left of the word "Action" in a bold, blue font. Above "Action" is the word "community" in a smaller, blue font. Below "Action" is the word "PARTNERSHIP" in a smaller, blue font. To the right of "Action" is the tagline "Making People. Changing Lives." in a small, blue font. Below the tagline is the text "COMMUNITY ACTION PARTNERSHIP" in a small, blue font.

The CSBG PMF incorporates extensive input from the CSBG Network

CSBG Performance Management Framework (PMF): Implementation

- Local Organizational Standards
- State and Federal Accountability Measures
- Results Oriented Management and Accountability (ROMA)
- CSBG State Plan
- CSBG Annual Report
- ACSI Survey

What is ROMA?

Results Oriented Management and Accountability

- Results Oriented – basic assumption that your agency services and strategies are provided to produce results (change).
- Management– the system for producing and monitoring services and strategies
- Accountability – the process for knowing, documenting and sharing the impact of your efforts

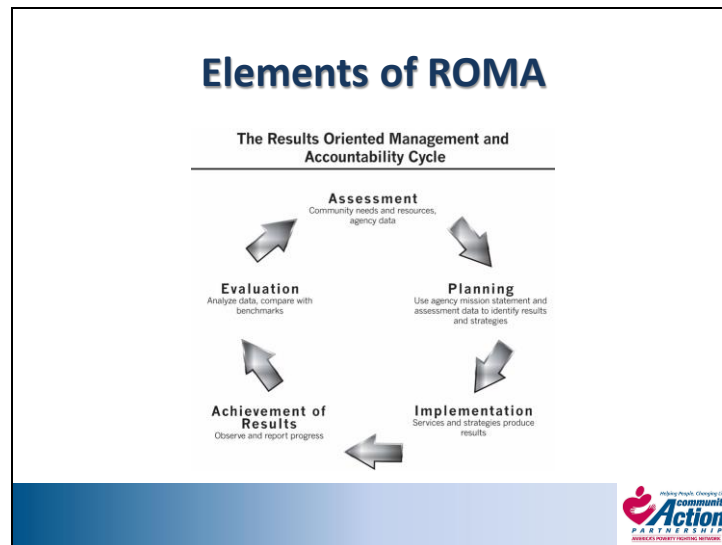

You might think this is a simple question.

But many people have not clearly thought about what is behind the “four letter word” that is ROMA.

We are talking both about fundamental assumptions and about systems that support the assumptions.

ROMA has been a part of the CSBG network since the early 1990s and was included in the last reauthorization of the CSBG act in 1998.

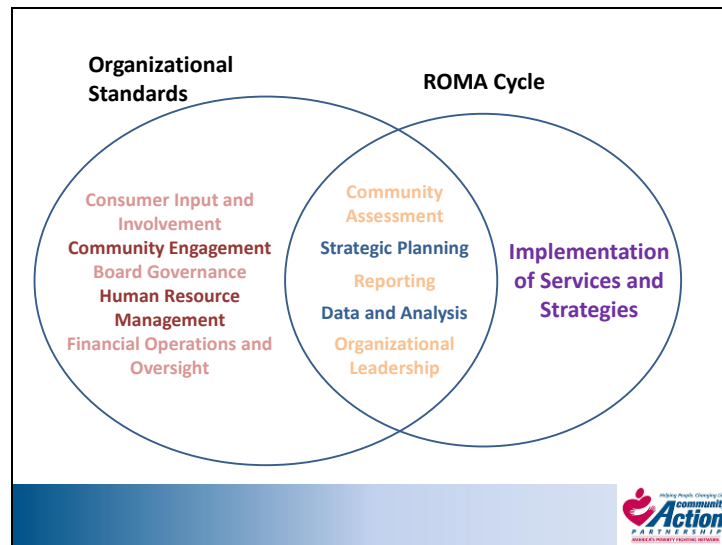

We are familiar with the ROMA Cycle which shows elements of the systems and process for management and accountability, but we need to step back to consider the “results orientation” part of the term more completely.

This graphic is based on IM 49 (2001)

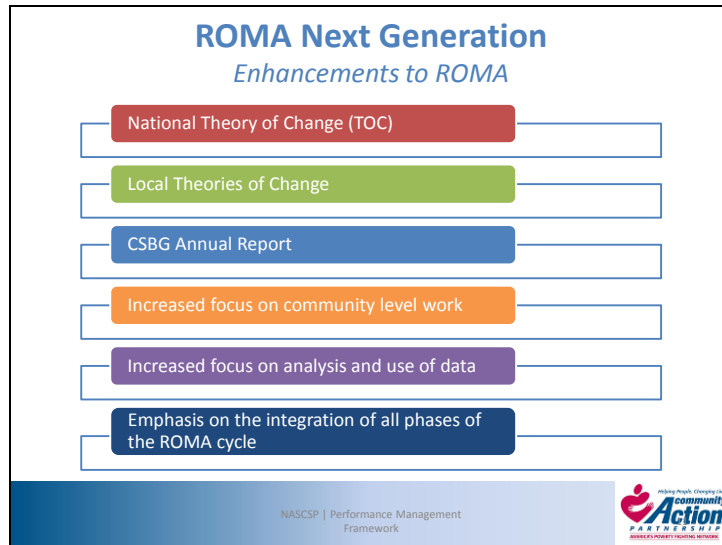

Organizational Standard 4.3

The organization's Community Action plan and strategic plan document the continuous use of the full Results Oriented Management and Accountability (ROMA) cycle or comparable system (assessment, planning, implementation, achievement of results, and evaluation).

This shows the most obvious of the overlap between Org Standards and ROMA, but there are lots of ROMA principles and practices embedded in the elements on the left side that impact the agency's ability to deliver high quality services and strategies (on the right side)

What is a Theory of Change?

- A Theory of Change (TOC) is a conceptual road map for how an organization expects to achieve its intended impact.
- While similar to a logic model (which has detailed information about needs, activities, inputs, outputs, outcomes, and indicators), a Theory of Change demonstrates the “big picture” about how all of these components work together.

Ask participants if they have ever heard of a theory of change...get responses.

What about a logic model? Do any of them use a logic model? Get responses.

A Theory of Change Is Like a Logic Model

- It includes the core principles of the network, identification of strategies and services, and how the network will convert their organizational and financial resources into the desired results.
- Often a graphic presentation of a mission statement

How is it similar to a Logic Model?

The TOC is like the ROMA logic model in that it is a way of presenting a series of interrelated concepts so that they can be understood as a “big picture.”

Specifically, it focuses on making the connections among identified need, the agency response and the changes that are projected and actually accomplished. It ties all these to the agency's mission.

How is it different than a Logic Model?

It's broader than a Logic Model. It adds a focus on the articulation of assumptions, and the processing of what has been learned.

It prompts analysis of the actual results identified at the end of a service period and provides the framework for data reflection related to review of how the services were provided and how the outcome data was collected. The Logic Model does not specifically identify "how" this type of reflection should be framed.

There's a consideration of external factors and the preconditions related to the achievement of results. This context helps the agency identify what is in their control and what is not.

•Q: How did the Community Action Theory of Change come about? A: In 2011, Community Action leaders began to gather feedback, through surveys, listening sessions and webinars, on the core principles of the Community Services Block Grant Program (CSBG). The network stated that it was critical for this theory of change to reflect elements of the current CSBG Act, incorporate CAA history, vision and values; as well as include fresh and innovative thinking about the future of our work. The resulting document articulates core principles for the Network, identifies CAA Network national goals, demonstrates the CAA Network’s unique approach to addressing poverty, and makes a complicated system easier to understand.

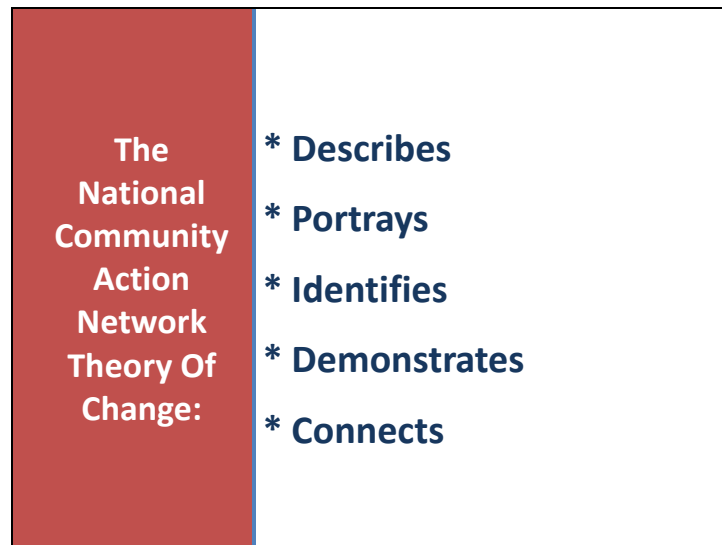

•The National Community Action Theory of Change was developed from input collected from the field between 2013 and 2016. It evolved over that time as elements of the PM Framework were constructed and finalized. An early draft of the TOC graphic was included with the Annual Report submission for OMB approval, and the graphic you see here is the one that was finally approved by OCS and released August 18, 2017.

•The introduction of the National TOC creates a snapshot of the complicated mission and vision that plays out through local CAAs, state associations, state offices, national partners and the federal office (OCS)

•A theory of change is a brief expression of the assumptions that underpin the network’s actions, identification of the areas in which the network will provide strategies and services, and

the expectation of excellence of the network that will convert organizational and financial resources into the desired results.

- It provides a **conceptual road map** for how an organization expects to achieve its intended impact.
- This is very similar to a **logic model** (which has detailed information about needs, activities, inputs, outputs, outcomes, indicators) but has the additional dimension of saying what the network believes and why it believes what it does will make a difference.
- This TOC demonstrates commitment to accountability via Performance Management
- Goal: Making a complicated system easier to understand.

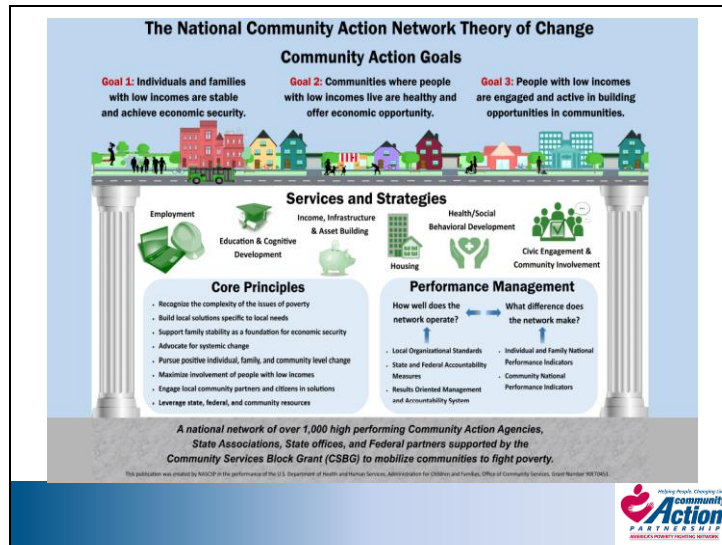

***Describes** the elements of a common framework Community Action Agencies (CAAs) use to produce change.

***Portrays** the broad picture of Community Action: long term goals, core principles, and system capacity.

***Identifies** the assumptions and core principles that guide the design of services and strategies to reach the long-term goals it hopes to achieve.

***Demonstrates** commitment to accountability for the entire network through the Performance Management Framework and specifically to agency excellence through the Organizational Standards.

***Connects** the foundation of a high performing national network to the services and strategies implemented by local CAAs in order to achieve the national Community Action goals.

Have this as a handout

The national TOC is the **articulation of the underlying beliefs and assumptions** that guide a service delivery strategy.

It identifies the “why” and the “how” of the activities undertaken and it identifies the “what” of change and improvement produced.

Incorporates CAA history, vision and values.

Articulates core principles for CAA Network.

Identifies CAA Network national goals.

TOC provides general guidance for the CSBG Network regarding the goals for individuals, families and communities – and sets out some expectations about “high performing agencies” and performance management (org standards, ROMA)

Applying the National TOC to Your Agency

- Not all local CAAs are the same
- Each CAA will use the Performance Management Framework in ways that match their identification of local community needs and resources
- At the local level you will want to demonstrate

How well does the AGENCY operate?

↑ ↓

What difference does the AGENCY make?

The slide features a blue gradient bar at the bottom with the Community Action Partnership logo on the right. The logo includes the text 'Making People. Changing Lives.' above 'community Action' and 'PARTNERSHIP' below it, with a red heart icon.

Note to facilitator: throughout the day you are going to come back to these two questions, so you could write them on a flip chart and post so you can easily refer to them.

Consider – What Results?

What stands in the way of a “results orientation?”

- A historical focus on what we do, not what we accomplish
- Confusion between services and results.
 - If we give out food boxes and people receive food boxes, the receipt of the service is sometimes considered to be an outcome.
 - It is not an outcome. It is receipt of a service.
- Lack of follow up
 - lack of resources for follow up, lack of measurement plans

Because it is important to know how much service we are able to provide with the CSBG funds and the additional funds they leverage, CAAs have always been asked to identify the number of people they serve and to quantify the services they provide. More recently the focus has shifted to also knowing what has happened because of our activities.

Note: more recent is 20 years. We have had 2 decades to make the shift in perspective, so why hasn't it happened universally across the country?

Next bullet is one reason.

The “food distribution” issue is a common one raised by agencies across the country.

The “results orientation” question is: What has changed for people who received the food? Do we know?

This brings us to the last bullet on this slide: **follow up**

Without follow up, the only thing you know for sure is that the service was delivered.

What are the problems with doing follow up?

One that we hear all the time is that there is not enough funding to support follow up.

See what people in the audience think about this idea.

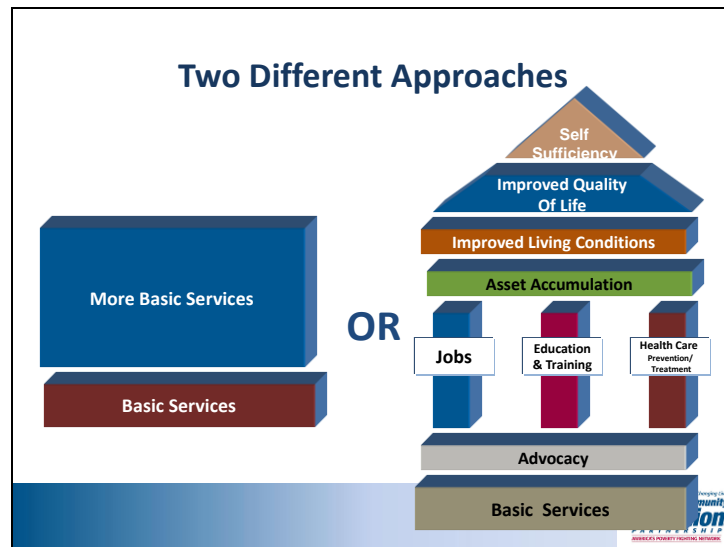

Another is that a plan for follow up (for “measurement”) is not included in the other planning activities.

Refer back to the flip chart with the list of outcomes you generated in the last activity and ask what kinds of measurement tools and processes people have in place to know if the outcome occurred or not, or if there has been progress towards the outcome.

Make notes about the measurement tools.

In this part of the discussion, you might find that some of the things you previously wrote as outcomes are really outputs.

Discuss the differences at this time and circle the items that really are outcomes.

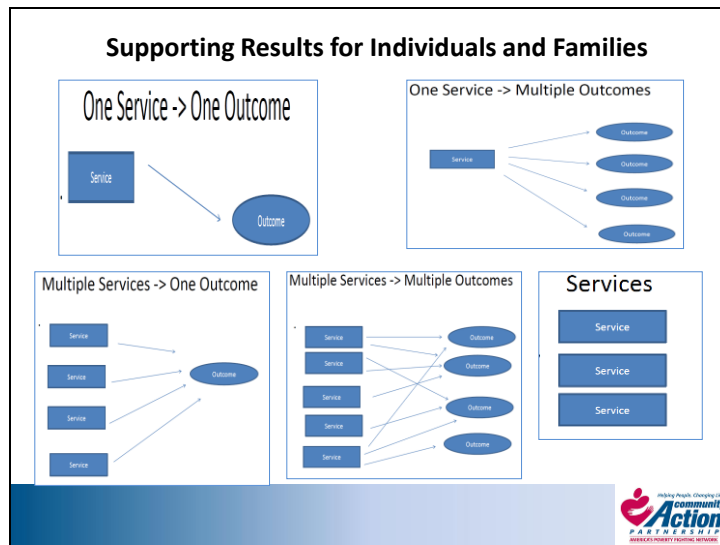

Community Action Partnership of Kern County CA

They start with this question: HAVE WE ENDED POVERTY YET? WHY NOT?

They found that they were delivering basic services which were not moving people or changing their lives,

They moved to a theory of change based on building a “house” of different services and approaches that will lead to the outcomes at the top.

IF YOUR AGENCY IS ADOPTING A “RESULTS” ORIENTATION, YOU MUST CONSIDER THE AGENCY’S APPROACH TO GETTING THERE.

This series of slides shows how services can be considered.

Some services produce a single outcome (GED prep class > high school diploma), while others produce several outcomes (case management > secure housing, increase job skills, etc.). Sometimes multiple services are needed to produce a single outcome (food, transportation, child care, job search > secure employment). Multiple services can also produce multiple outcomes (someone receiving all the services mentioned above may achieve other outcomes besides just securing employment – such as outcomes associated with family stability)

Sometimes services are provided but no follow up is done to find out what the impact was. Some services are designed to meet an immediate crisis but there is no expectation to see a change in status for the recipient. Receipt of a food box may be important to tide the family over until other resources are developed, but the food box alone does not change (or contribute significantly to) the situation of the family.

These are areas considered to be services without direct outcomes:

Provision of food boxes

Providing a job fair or health fair or other community event that has no follow up and no specific objective for change.

Provision of child care

Provision of transportation

Remember they may contribute to an outcome but only if that is the intention of the provision of the service. If the provision of the service IS the end, that is an output and is not connected with an outcome.

Slide 22

ACTIVITY: What are the service -> outcome connections?

- Think about the services your agency provides and the strategies you have been involved in.
- Identify the outputs and the associated outcomes:

PROGRAM NAME:	
Outputs	Outcomes

Group participants for this activity. If you have people representing different programs, this is an activity where it would be useful to have participants grouped with their own programs.

Give each group a flip chart page and have them divide the page as the table on this slide – add program name at the top and then Outputs and Outcomes at the top of each half of the page.

Ask them to think about the primary activities (outputs) that they and their customers engage in and put them on the left side of the chart.

Then ask them to connect to the outcome that is produced (or is the target) of the service.

Bring the groups back and have them share –

Help them identify if the things in the outcome column really are about something that changed for the customer/community.

If you see a lot of outputs in the outcome column, make notes of these and say we will come back to discuss these further as we progress in this workshop.

Think About It!

- Considering your own agency Mission and the services and strategies you provide can be a window into what you are communicating to the community.
- Are these really the assumptions of your agency? Your staff? Your board?
- Do your mission and services help to identify the big goals your agency has?

Do you have a local Theory of Change? There is a lot of information in other places about creating local theory of change so it will not be repeated today. There is a separate workshop devoted to helping your agency walk through the development of a Local TOC.

Local Theory of Change

- What does your agency believe it should be doing to address issues related to poverty in your community?
- The answer to this question will guide the selection of outcomes and actions that will accomplish those outcomes.

The logo for Community Action Partnership features a red heart icon to the left of the text. The text reads "community Action" in a bold, sans-serif font, with "community" in a smaller size above "Action". Below "Action" is the word "PARTNERSHIP" in a smaller, all-caps font. At the very bottom, in a very small font, is the tagline "HELPING PEOPLE. CHANGING LIVES."

Briefly state that if the agency has done the TOC work, then the agency KNOWS what it wants to accomplish and how it thinks it should do its work.

If the agency has not done this work, then this is something that will help the agency move to a “results orientation” by really understanding what they believe and what they expect to accomplish. Why are they in business? To perpetuate poverty in the community? NO. To make it easier for people to remain in poverty? NO.

What does the community THINK the agency is supposed to be doing?

Some agencies that do these activities are surprised to see what the community might be thinking about them.

If it isn't what they want to project, they have to consider what they can do to fix their image.

Local Theory of Change

Starts with acknowledging specific assumptions about:

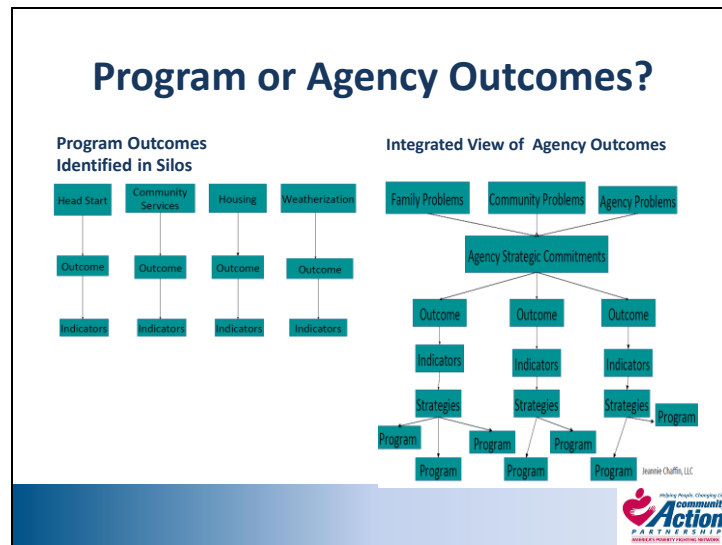

- the causes and conditions of poverty in your local community
- the agency's role in addressing the issues related to poverty.

The logo for Action Partnership, featuring a red heart icon and the text "Action PARTNERSHIP" with the tagline "Making People. Changing Lives." and "HELPING PEOPLE. CHANGING LIVES." below it.

It is important to be sure the Board Members and staff all understand what **the agency** believes about poverty and the agency's role.

You could ask participants to think about prior reports of their success, about their most recent CNA and to think about what this tells them about poverty issues in their own community. This also brings up the question about levels of need -- the agency needs to at least begin to actively think about how it is going to approach the identified and prioritized issues in their community. Will they work with individuals and families? With the larger community to tackle big problems? With their own agency staff and processes to improve things that are holding them back from producing results?

Refer back to the activity. Connecting outputs and outcomes at the program level. Now have participants think about how those various program level outcomes come together to produce outcomes to meet the agency’s mission.

When you work on creating a Theory of Change, you have to consider how the programs in the agency operate (together or in silos).

Many agencies do a great job of identifying the outcomes for each of the specific programs they have.

And they are good grant managers.

The challenge we are faced with in the 2019 Performance Management Framework is to figure out how all of those separate program level outcomes work together for larger agency outcomes – and meet national goals.

It is also part of the process to consider how family and community work must support each other – and how the agency’s health is an important cog in the works.

Trying Something New

- Think about how “we have always done” the work of the agency
 - What is real, what is true, what is good, what has been done?
- Think about the outcomes (changes) that you have achieved in the past.
- Think about WHAT ELSE your agency could achieve if you were not focused on the provision of services (but rather on change).

The ideas that are generated by this kind of thinking will influence your creation of your local Theory of Change

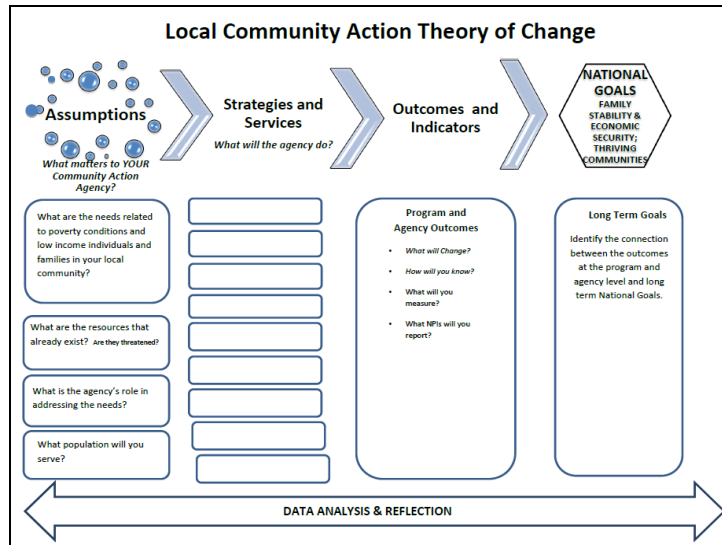

The agency will have to prioritizing the needs found in the CN A
What contributes to the priorities of the agency?

What is the criteria?

- What we’ve always done
- What we have funding to do
- What is most important to our board
- What is most important to our Executive Director

The big question we need answered - What is our approach to addressing the causes and conditions of poverty?

Get feedback from participants – what do they think about these concepts? Are they willing to try something new?

Note: this is a template included in the posted material about creating a local TOC Have it available as a hand out.

WRAP UP PART I with a couple key points:

The elements of the Performance Management Framework supports/reinforces the core concept that we are Results Oriented.

The National and Local Theories of change can help us operationalize the Mission of the agency and guide selections of services and strategies to meet the needs of the community.

A strong agency will meet Organizational Standards and have the capacity to help individuals/families/communities reach their outcomes.

In this section we are going to look at the two PMF questions
How well does the agency operate? And what difference does the agency make?

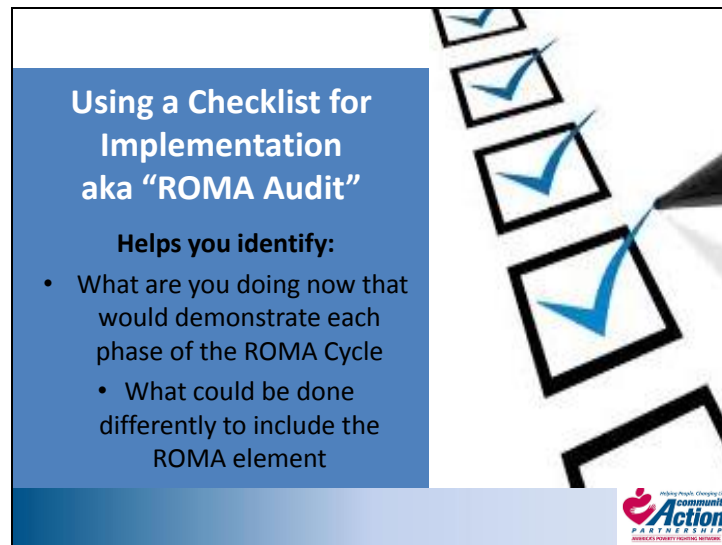

From two different perspectives:

- A deep dive into understanding the implementation of ROMA and
- Acknowledgement about the role of Organizational Culture in the way work gets done.

**If we don't know where we
started, we cannot identify what
has changed.....**

**If we can't identify the change,
we can't acknowledge success!**

Using a Checklist for Implementation aka “ROMA Audit”

Helps you identify:

- What are you doing now that would demonstrate each phase of the ROMA Cycle
 - What could be done differently to include the ROMA element

Making People. Changing Lives.
community Action
PARTNERSHIP
RESEARCH. ADVISORY. TRAINING. SERVICES.

It is important for us to find out what is current status -- this is how we actually determine what our needs are, then we can identify what we want to see change, and from there make a plan.

NOTE: IF YOU ARE AN NCRI WHO IS GUIDING THIS PROCESS OR IF THERE ARE NCRIs INCLUDED IN THE WORKSHOP:

The NCRI Portfolio asks for this kind of information at the end of each section. What does the agency do well at this phase? What could be done differently? Before you engage in this workshop, pull the portfolio out and review what you identified in the ROMA Cycle phases. This will be a start for your Audit.

ROMA Cycle	ROMA Action Item	
Mission Local TOC	Documentation that current Mission statement has been reviewed within the past 3 years.	4
	Evidence that the mission statement is used in guiding the agency's decisions and actions.	
Assessment	If the agency has a Local Theory of Change, evidence of how it is used in decision making, communications, etc.	
	Identifies the community being assessed (could be service area or other designation)	
	The Community Needs Assessment includes a variety of data from reliable sources:	Tr air dat and
	Quantitative Data	
	Qualitative Data (including input from customers about their needs and the needs of the community)	
	Customer Satisfaction Data	
	Resources (in the community)	
	Agency Report Data	
	Identifies the population in need	
	The needs are identified as family, agency, and community levels	
The needs are prioritized using _____ technique		
Planning	Identifies the involvement of the Board of Directors	
	There are several agency plans that can be considered as a part of ROMA Implementation.	Ag = str P
	The needs (at least the top 3 to 5) identified in the CNA are addressed in the plan and are connected to an outcome expected to be achieved. <i>The levels of need and outcome match.</i>	
	The needs and their related outcomes are connected to appropriate services for individuals and families and/or strategies at the community and agency level.	
	Outcome indicators are identified for each outcome. <i>They may be connected to the life.</i>	
	Measurement tools and processes are identified.	
	Identifies the involvement of the Board of Directors	
	There is some documentation regarding how the plans work together to produce an agency wide "results orientation."	
	MOUs in place for community level work	
	Information about how the agency's facilities and program operations support high quality implementation of services and strategies	

Pass out copies of the ROMA checklist
 You are going to give them some ideas about the checklist before approaching each of the segments individually.

WHEN COMPLETING THE CHECKLIST, CONSIDER:

--What can you identify right now for each phase of the cycle?

--What do you need to find out more about?

--Who do you need to talk to (to find out what is happening in other departments)?

In each phase of the ROMA Cycle, consider:

- Who is involved and what do they do? Is their work done at program or agency level?
- What is expected to be achieved in each phase for the agency? For the specific program? What (if anything) is required by other funding sources?
- How does the agency collect, aggregate and analyze the data in each phase? Is it different in different departments? How does it come together for the agency?
- How will you know if the activities and processes are being done well? Are they successful? What makes the process useful?
- How is the data/information from each phase used at the program or agency level? What would happen if this part of the cycle was left out? What if it was improved?

The logo for Community Action Partnership features a red heart icon to the left of the text. The text includes 'community' in a small font, 'Action' in a large, bold, blue font, and 'PARTNERSHIP' in a smaller font below it. At the bottom, there is a tagline: 'MAKING PEOPLE OVERCOME CHALLENGES'.

These questions can be used as an “interview format” to guide your discussions with other departments and other people at the agency.

Seem like a lot?

Let’s see what one agency has done to begin to understand their agency!

Case Study

Debbie Markman
Resource Development Director
Economic Security Corporation of
Southwest Area, Joplin, MO

Note to facilitator: For a deeper dive of the case study, you may show the case study video in place of or in addition to slides 36-41.

<https://youtu.be/sQCe1Q5abf0>

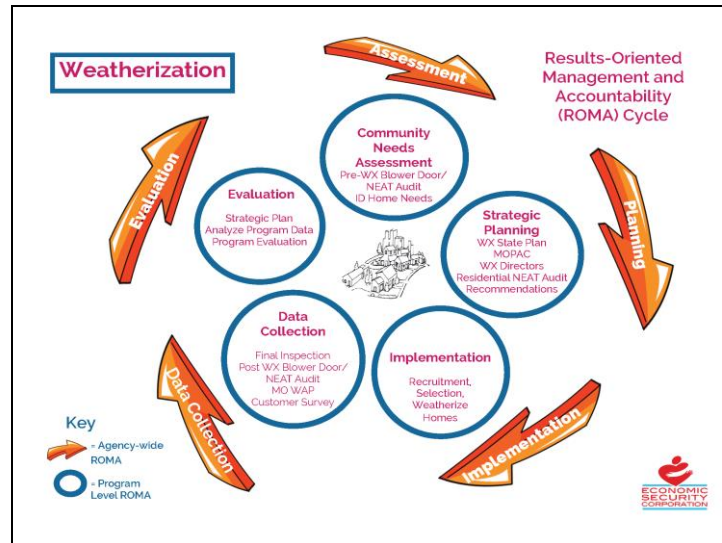

An accompanying Case Study publication is available on ESC as well.

How do you know?

To find out who is “doing ROMA” it is important to talk to peers and colleagues in the agency.

Working People. Changing Lives.
community Action
PARTNERSHIP
COMMUNITY ACTION PARTNERSHIP

Debbie says: “3 years ago, Weatherization Director asked me (after a ROMA training), how could this be relevant for his Weatherization crew. So I literally stared at this graphic on my wall, building and refining it with notes I gathered for 2 years.

Note to facilitator: at the Partnership web site there are examples of other departments in Debbie’s agency

ESC's Weatherization ROMA Audit - Evaluation

ROMA Cycle	Documentation includes:	Who is Responsible?	Organizational Standards Head Start Performance Standard	Why	Why	Why	Why	Why	Why	Why	Why	Month Work Starts	Identified need for additional help	What type of help is needed?	Who will be providing the help?
How does this program get reported on ??/LHEAP collects data using the State's LHEAP software system	Unclear	WX Director and ROMA Implementer/Trainer										July/June	Looks like this area needs a bit of work from our ROMA staff, understanding what reports they do receive and then how can those be applied.		
Public Utility Funds - What do we report versus what we should be reporting. Will need help with this??	Unclear	WX Director and ROMA staff										July/June	Unclear how this information is collected and reported out.		
Evaluation															
Evaluation of WAP?? plans, outcomes and objectives. Ask the WX Director what does this look like??	Unclear	WX Director and ROMA staff						X				July/June	Evaluation process needs to be ID	Evaluation process needs to be ID	
Evaluation of LHEAP??	Unclear	WX Director and ROMA staff						X				July/June	Evaluation process needs to be ID	Evaluation process needs to be ID	
Evaluation of Public Service Commission and Liberty Utilities "good people"	Unclear	WX Director and ROMA staff						X				July/June	Evaluation process needs to be ID	Evaluation process needs to be ID	
Weatherization Staff Development, equipment and facility needs	Unclear	WX Director and ROMA staff						X				July/June	Evaluation process needs to be ID	Evaluation process needs to be ID	
Presenting Analysis and Evaluation to Board	Agency grade card	WX Director and ROMA staff	OS 4.4, 5.9, 8.5, 9.3					X				July/June	Evaluation process needs to be ID	Evaluation process needs to be ID	

You will see that as they got to the Reporting and Analysis (evaluation) of data, that more items were flagged as needing more information for clarification or improvement.

Note to facilitator: be sure YOU are able to read this page, because it does not project well and you will have to talk about the items that are identified.

All this work produced this Local TOC (example from Debbie agency *Economic Security Corporation*) – you could have it as *handout*

This is how the ideas from their work at assessing the agency functioning were presented after a graphic artist was engaged.

Debbie says: Now this is in every office in every location of the agency. It is the guiding force behind activities and will be the basis of future planning

Considering Each Phase

- Mission and Local TOC
- Assessment
- Planning
- Implementing
- Reporting
- Analysis
- Reassessment

The logo for Action Partnership features a red heart icon to the left of the word "Action" in a bold, blue, sans-serif font. Above "Action" is the tagline "Making People. Changing Lives." in a smaller, blue font. Below "Action" is the word "Partnership" in a smaller, blue font. At the very bottom of the logo, there is a small line of text: "A COMMITMENT TO EXCELLENCE".

This will help the agency see the specifics of each phase of the ROMA cycle so they can begin a process similar to the one Debbie's agency used

Note to facilitator: this is just a list of the elements in the check list. With each of the slides that follow, have participants look at the checklist you have handed out and talk to their neighbors about what they think they will find at their agency. Have them make notes on the checklist regarding things they want to follow up on.

After the group work for each section, ask for report from the group about what they talked about. Make notes on flip chart.

Mission and Local TOC

- What do you know about your Mission statement?
 - has been reviewed within the past 3 years
 - Is used to guide agency decisions and actions.
 - Meets Organizational Standard 4.1
- If the agency has a Local Theory of Change, it is used in decision making, communications, etc.

The logo for Community Action Partnership features a red heart icon to the left of the word "Action" in a bold, blue, sans-serif font. Above "Action" is the word "community" in a smaller, blue, sans-serif font. Below "Action" is the word "PARTNERSHIP" in a smaller, blue, sans-serif font. At the very bottom of the logo, there is a small line of text: "MAKING PEOPLE. CHANGING LIVES."

This will begin a series of table activities, where the participants can talk about each phase of the Cycle and make notes

If agency has no local TOC, how might a process to consider the agency's assumptions and overall goals be useful?

Ask for report out.

Assessment of Needs and Resources

- The Community Needs Assessment includes a variety of data from reliable sources
 - Qualitative, Quantitative, Customer Satisfaction, Resources, Agency Report
 - CNA identifies population in need
- Is there a clear process for making meaning out of all the assessment data
 - Identifies family, community, agency levels of need
 - Who is involved in the analysis of data?
 - How are priorities identified?
- Agency meets Org Standards 3.1- 3.5
 - CATEGORY THREE: Community Assessment
 - Board involvement is documented

The NCRI portfolio asks for examples of each of the kinds of data that is expected to be included in the CNA.

This group can take a similar look at the actual document to see what is included, how useful it is to creating a profile of the community, and what processes are included to analyze the raw data (turn it into information).

Stimulate the Discussion – how are priorities established? Is it JUST the item that got the highest number of comments? If 90% of the individuals interviewed or surveyed said they could not afford their housing, does this become a priority for the agency?

What else must be considered?

--Agency mission. (Does your agency have capacity to address this issue? Is the agency dedicated to this issue – or is it focused on employment or other domain?)

--Resources the agency has or can develop (does the need align with the services you already provide? Consider what role the agency will play if the top need does/does not align)

--Partnerships the agency has or can develop

What else?

Ask for report out.

Planning

- There is an agency-wide Strategic Plan
- The Community Action Plan is a part of the Strategic Plan
 - Focused on issues related to families and communities of low income
 - Identifies how agency funds are used to meet broad agency goals (not just program activities in silos)
- Plans connect directly to Community Needs Assessment
 - Identifies both outputs and outcomes
 - Identifies how success will be measured
 - Tools, indicators, etc.
- Agency meets Org Standards 6.1- 6.5
 - CATEGORY SIX: Strategic Planning
 - Board involvement is documented

The logo for Community Action Partnership features a red heart icon to the left of the text. The text includes 'community' in a smaller font above 'Action' in a larger, bold font, with 'PARTNERSHIP' in a smaller font below it. At the bottom, it reads 'MAKING PEOPLE CHANGING LIVES' and 'COMMUNITY ACTION PARTNERSHIP'.

Consider the difference between Strategic Plan (agency wide) and the Community Action Plan used for CSBG funding requests.

Also consider other program plans (proposals) that provide identification of services/strategies, outcomes and how success will be identified.

Ask for report out

Implementing Services and Strategies

- Understand the Human Resource policies and procedures related to staff qualifications, training, supervision, monitoring, etc.
- Staff have access to resources for improvement of knowledge and skills
 - **CATEGORY SEVEN: Human Resource Management**
- Fiscal policies and procedures are in place to assure funds are spent appropriately to support achievement of outcomes
 - **CATEGORY EIGHT: Financial Operations and Oversight**
- There is process in place to secure Customer Satisfaction feedback
- All level of staff understand the target population to be served and the expectations related to service:
 - How many people will be served?
 - Who are they?
 - What service do they get?
 - What changes?
- Community strategies are understood, discussed and monitored throughout the agency staff and board.

How is quality of service/strategies assessed? Remember that the performance management framework is about improving efficiency and effectiveness.

Ask for report out.

Observation of Results and Reporting

- Do all staff in the agency understand the system for data collection and aggregation into reports?
- Are reports shared with program staff? Shared across programs (agency wide reporting practices)?
 - What is included in the reports?
 - Demographics of the population served
 - Service provided
 - Outcomes achieved
- What info is provided to the Board?
 - Do they review reports?
- Is CSBG Annual Report data submitted to the State Office, assuring accuracy and timeliness of submission.
- Agency meets Org Standards 9.1, 9.2, 9.4

The logo for Community Action Partnership features a red heart icon to the left of the text. The text includes 'community' in a small font, 'Action' in a large, bold, blue font, and 'PARTNERSHIP' in a smaller font below it. At the bottom of the logo, there is a tagline: 'Making People. Changing Lives.' and the website 'www.communityaction.org'.

Participants can talk about these points in general, ask for report out, and then you will facilitate two other activities related to observation and reporting.

GUIDE TO DATA POLICY DEVELOPMENT

What goes into our data policy and procedure?

Document the current data collection practices. *(two examples here in green)*

Who collects the data?	What data elements are collected?	Process? How is the data collected? Where is it stored?	Why collected?	Who needs to see the data? How is it retrieved from storage?
Receptionist	<i>Name, who they are seeing. If first time, why did they come to the agency</i>	<i>Paper sign in, kept in a folder at the front desk or electronic sign in either by the receptionist or by the client</i>	<i>To monitor the management of the waiting room or to help determine where to send the person for services</i>	Receptionist's supervisor Collects and reviews the file at end of each week
Case Manager	<i>Comprehensive intake data; placement on a scale</i>	<i>In office interview, case manager enters data into a computer data base or uses a paper form and enters the data after the interview</i>	<i>To have demographic data to report on the IS report; to have information to develop a care plan Scale data to determine need resulting in baseline based on presenting need</i>	Case Manager's supervisor – runs a report of activity each week Person who assembles the IS report – runs a report annually for state/national reporting but may run reports more frequently for agency internal use

This is a hand out for the first of the additional activities related to observation and reporting of data. This one focuses on where/how data is collected and who does the collection.

Take time to get participants to talk about data collection in their own agency using this tool as a guide. *Who collects? When? What do they do with the data?*

Challenge them to go back to their agency and consider the data that is collected by each staff person in the agency!

Considering Your Reports

- Quality of the data provided
- Presentation of the data in the report
- Usefulness of the data to your specific job duties; usefulness to the decision makers
- Performance Focus

This is the second activity – focused on considering the agency’s reports.

This can stimulate general discussion about what reports there are in the agency. Post the names/descriptions of the reports on a flip chart pad. Ask “who gets these reports?” Add that info to the flip chart.

Provide handout of the Assessing Your Reports tool.

Ask participants to pick one report they are really familiar with, and respond to say if the report data has:

- Quality of the data -- Accuracy, completeness and timeliness of the data included in the report (4 items)
- Presentation of the data in the report – it is easy for the reader to find data that is important to him/her? (6 items)
- Usefulness of the data – is it relevant to the task of managing the program/service? Do I have access to the data when I want/need it? (7 items)
- Performance Focus – includes data on outcomes and performance (3 items)

Do you know how the outcomes are measured?

Analysis of the Data/Evaluation

- How is data/reports used?
 - Compare actual results with performance targets/projected success rates
 - Compare the demographics of the population served with the population identified to be in need in the CNA.
 - Consider the connections among people, services, and outcomes.
 - Identify those who have received single services, multiple services, or bundled services and determine the difference (if any) in their outcomes.
- Are questions asked that will need additional assessment data?
- Does the Board receive recommendations based on analysis of data?
 - Are recommendations and decisions based on data?
 - Organizational Standard 9.3
- Does the agency take action based on analysis of data?
 - Adjust performance goals as needed as evidenced by actual performance.
 - Continue strategies that achieve desired performance goals.
 - Revise or discontinue strategies that do not achieve desired performance.

The logo for Community Action Partnership features a red heart icon to the left of the word "Action" in a large, bold, blue font. Above "Action" is the word "community" in a smaller, blue, sans-serif font. Below "Action" is the word "PARTNERSHIP" in a smaller, blue, sans-serif font. At the very bottom of the logo, there is a small line of text: "MAKING PEOPLE CHANGING LIVES".

This is the last of the cycle phases. (Note: we will continue around the cycle, with reassessment and planning following in a couple slides)

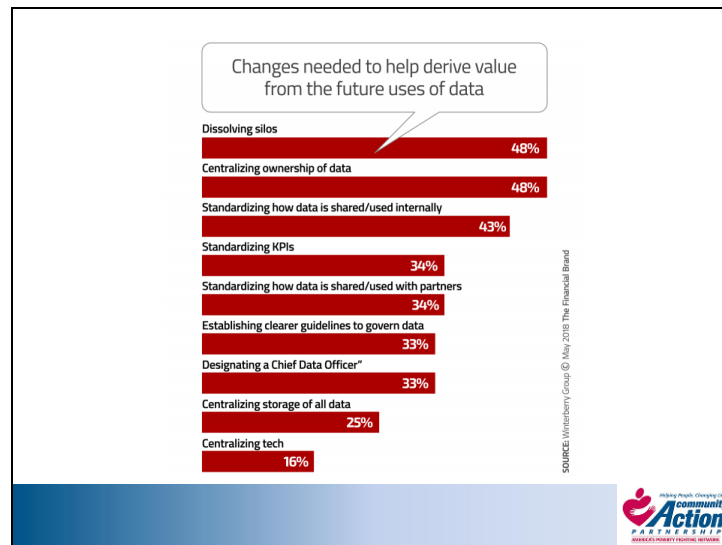

After time for discussion, ask for report out.

Ask what would need to happen to assure improved value from the analysis of data in the agency could be achieved.

Take notes on flip chart.

There are a couple ideas on the next slide.

Slide 51

This is just one agency’s idea of changes that are needed to improve use of data.

Ask participants if any of these sound important for them to consider also.

Refer to the list you made from the group and see if there is overlap.

The point to leave participants with is that they will have to take action to assure that agency data is analyzed and used for improvement.

Reassessment, Planning Updates

- Based on analysis and recommendations, what additional assessment data would be useful for agency decision making?
- Collect appropriate data elements to refine assessment profile.
- Update plans based on new data.
- Consider if the data collection and analysis processes are working or if they need to be modified.

As ROMA is a cycle, we are back to reassessment and updating the plans. Ask for any ideas about the importance of continuing to reassessment following analysis of data.

Establishing a Profile

ROMA Cycle	ROMA Action Item	date	date	date	date	Comments
Mission	Documentation that current Mission statement has been reviewed within the past 3 years.					
Local TOC	Evidence that the mission statement is used in guiding the agency's decisions and actions.					
	If the agency has a Local Theory of Change, evidence of how it is used in decision making, communications, etc.					
Assessment	Identifies the community being assessed					
	The Community Needs Assessment includes a variety of data from reliable sources:					
	Quantitative Data					
	Qualitative Data					
	Customer input about their needs and the community needs					
	Customer Satisfaction Data					
	Resources (in the community)					
	Agency Report Data					
	Identifies the population in need					
	The needs are identified at family, agency, and community levels					
The needs are prioritized using _____ technique						
Identifies the involvement of the Board of Directors						

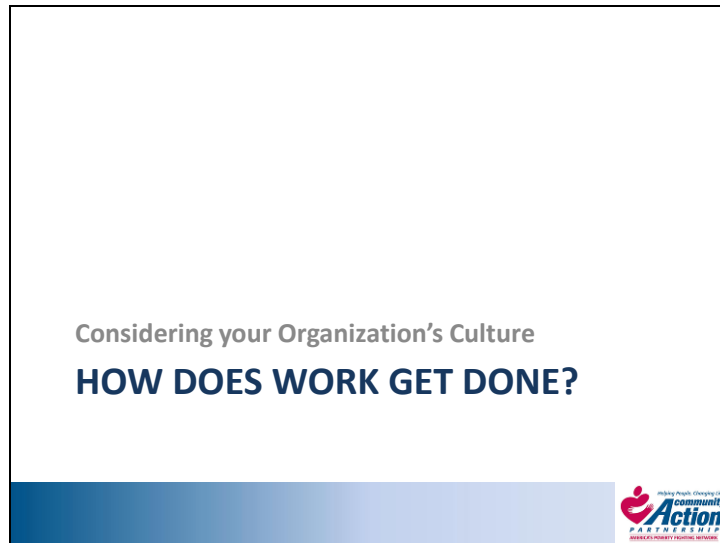

Similar to what we saw from Debbie’s agency, it will be important to SEE (using a graphic or visual representation) where the agency is doing well and where there are changes needed.

Using the checklist as shown here can allow you to note the agency current status in each phase Ideas: using a check if the area is functioning well, or a color code (red, yellow, green) or making reference to a scale” maybe using numbers (identifying benchmarks as 1 = “in crisis” to 5 = “thriving”)

You will see later how this profile can be used to create a scorecard to monitor progress.

Slide 54

Considering your Organization's Culture
HOW DOES WORK GET DONE?

Making People. Changing Lives.
Action
COMMUNITY PARTNERSHIP
AMERICAN RED CROSS AMERICAN RED CROSS

This slide starts the second part of Part II
We are turning to consider organizational culture now.

Work gets done

Drucker cautions us:

“Work doesn’t get done by a magnificent statement of policy. Work is only done when it is done. Done by people.
By people who are properly informed, assigned and equipped.”

Afterword, Five Most Important Questions

The logo for Community Action Partnership features a red heart icon to the left of the word "Action" in a large, bold, blue font. Above "Action" is the word "community" in a smaller, blue font. Below "Action" is the word "Partnership" in a smaller, blue font. At the bottom of the logo, there is a small red banner with white text that reads "MAKING PEOPLE CHANGING LIVES".

Yes, this is an important point to consider... and we would like to add that, when thinking about ROMA implementation, the work needs to be done by people who have a “results orientation.”

The orientation of the people assigned the work is a reflection of the organization’s culture. So we have to take some time now to consider what we mean by “organizational culture” and why it is important to understand the culture that impacts the behavior of the people involved.

Later we will talk about improving a ROMA Culture.

Specific organization may have its own practices, norms and understandings that the people within it have developed over time, creating an organizational culture that is apparent to both those on the inside and out. Not surprisingly persons from outside an organizational culture when forced to interact with it may find its policies and procedures puzzling or problematic.

Why is organizational culture so important?

- Culture shapes behaviors and help individuals understand the organization.
- Culture is often so strong and so powerful that when there is a discrepancy or inconsistency between the current culture and the objectives of change, the culture will win.

The “Culture” In An Organization

- Includes beliefs about
 - What the world is like (what is reality?)
 - How to respond to social and material environments
 - The appropriate way for people to interact with each other
 - Such things as chain of command and other management structures

One way to understand culture is to consider that people are programmed by their cultural group to interpret and evaluate behaviors, ideas, relationships and other people in ways that are unique to their group.

“Culture” is a set of social traditions passed on through an organized group.

This **set of traditions** help groups and individuals within a group decide what is considered **the correct** way of living, thinking, feeling and viewing the world.

The traditions form a **set of beliefs and ways to respond**.

It includes **attitudes, norms, and values** that the group accepts as valid and important. These beliefs can determine **the limits that members will live by** and be accepted by the group.

Culture Is Reflected in

- Way work is organized
- How technologies are used
- How staff responds to customers
- The understanding of conditions related to poverty
 - Health/wellness (including mental health), disabilities
 - education, motivation, etc.....
-

Aspects of culture all form over time and have a direct effect on how members of the community handle their problems and interactions with each other and the outside world.

The dots in the fourth bullet indicate that this list is just the start of identifying how you can recognize the impact of culture.

For instance: Does your agency have a service focus or a results focus?

Organizational culture

“is a pattern of shared basic assumptions that **the group learned as it solved its problems** of external adaptation and internal integration. These patterns have worked well enough to be considered valid...and therefore, taught to new members as the correct way to perceive, think, and feel in relation to those problems.”

- Edward Schein

A pattern of shared basic assumptions – (we all agree to these certain rules, norms, expectations)

That the group learned as it solved its problems – (come from facing challenges together)

Of external adaptation and internal integration – (how do we fit into the world and how do we work together)

That it has worked well enough to be considered valid – (we did this and had some success so it must be the way to go)

And, therefore, taught to new members as the correct way to perceive, think and feel in relation to those problems – (we better share with these newbies what we learned and how we deal with things around here. May be verbal or through nonverbal means. For example if someone reacts a way that is outside of our “norm” we may respond with an uncomfortable look or show a negative reaction. Newcomers quickly learn what is expected).

Consider that this is similar to our understanding of culture in general.

Organization Culture

- <https://www.youtube.com/watch?v=y-PvBo75PDo>

The slide features a central illustration of a brown cartoon monkey hanging from a banana stem. Below the main content area is a blue gradient bar containing the logo for Community Action Partnership, which includes a red heart icon and the text 'Community Action PARTNERSHIP'.

Show the video and discuss:

- How does this relate to our definition of organizational culture?
- Can you think of examples in organizations that are similar to the banana example? Behavior that is seemingly unexplainable but it is related to past constrictions and situations?
- What habits are continuing in your agency without being questioned?
- We do lots of things that we don't know why we do them. Some of them are things that used to have a purpose but no longer do. Some of them are actually barriers to doing the work better!

This is a commonly accepted idea about culture (the iceberg image) that has been adapted to reflect organizational culture.

The iceberg is divided into two parts and helps us understand workplace dynamics or organizational culture. The top part shows the visible, formal or overt aspects of an organization such as systems, structures, policies, technologies of an organization. This represents “the way we say we get things done.”

The lower part, below the water line, shows the hidden, informal or covert aspects of an organization such as attitudes, beliefs, values, and perceptions etc.

Consider...

- The **formal/overt messages** your agency uses in describing your services and goals
- The **informal or hidden** aspects, attitudes, feelings under the surface

The logo for Community Action Partnership is located in the bottom right corner of the slide. It features a red heart icon to the left of the word "Action" in a bold, blue, sans-serif font. Above "Action" is the tagline "Making People. Changing Lives." in a smaller, blue font. Below "Action" is the word "PARTNERSHIP" in a smaller, blue, sans-serif font. At the very bottom of the logo, there is a small line of text: "COMMUNITY ACTION PARTNERSHIP" in a very small, blue font.

Formal messages could be found on brochures, on the “talking points” used to describe your agency’s role in the community, on how your agency is profiled in listings or referral indexes. What images are displayed representing your agency? How do you think it is seen by your wider community?

It may be uncomfortable sharing informal organizational culture aspects. After all, they are “below the surface” for a reason. (Maybe you are unaware, or maybe things in some ways function better without this information being shared).

What aspects would you feel comfortable sharing? How information is shared between supervisors and workers, how clients are discussed within a staff meeting, what kinds of inter-departmental communication exists, etc. Are employees valued for their skills and abilities? What evidence is there that this is or is not true in your workplace?

One tool: Assessing the Organizational Culture

- Look Around
 - What do you see? What does that tell you?
- Internal Communications
 - Communications with Others
- Chain of Command
- Decision Making
- Values of the Organization
- Staff Qualifications and New Staff Orientation

-Provide handout of the Organizational Assessment

-As we said at the beginning of this presentation, we hear that organizational culture is blocking change – and so this brief section on org culture is an important reminder that NCRPs need to understand some basic underlying influences that would not be picked up in the “process and practice” ROMA audit. This would get at some deeper understanding of assumptions, and is a foreshadowing for the Local TOC development discussion that we will have at the end of the day.

This is a list of the items in the Org Culture assessment that is posted on the web

Detailed information about this will be in the posted material to accompany this presentation.

This is an activity that participants will take back to office and actually do.

For today they will just start to consider what all goes into Organizational Culture.

Look around

- What do you see at the entrance? In work spaces?
- How are people dressed?
 - Does this differ in the various areas of the building?
- How much interaction is there?
 - Who is talking to whom?
- Where do people congregate?
 - How is the furniture arranged?
- What is the noise level?
 - Is everything quiet? Or loud? Are people talking? Can you hear conversations? Or just general voices?

This is an example of some of the items you will be assessing -- this is the detail of the first item in the assessment (as identified on prior slide).

- What does the entrance say about the agency? Ask “is it inviting?” If there are not any responses you could “seed” the discussion with some questions like: Is the posted material in more than English? Are there “employee only” signs on some of the doors? Is the “receptionist” behind a wall? Or is there even a live person that can be accessed upon entry?
- What does your individual work space look like? Is the work space in your department different from other sections of the agency? Do staff have personal photos? Motivational posters? ROMA Posters?
- What are people wearing? Casual attire? Is this the same for all of the agency?
- What is the noise level? Is everything quiet? Or loud? Are people talking? Can you hear conversations? Or just general voices?

This will give them an idea of what we are looking for...

But there are more sections that deal with what written documents look like, how communication happens, what policies are enforced, what kinds of “celebrations” happen and so on.

**Another Set of Tools:
Are You Results Oriented?**

- Two surveys:
 - one that staff responds to about their own activities and
 - one in which they consider the agency's perspective

The logo for Community Action Partnership is located in the bottom right corner of the slide. It features a red heart icon to the left of the text 'community Action PARTNERSHIP'. Above 'community' is the tagline 'Helping People. Changing Lives.' and below 'PARTNERSHIP' is the text 'BUILDING TOGETHER. PROGRESS MATTERS.'

This is also posted on the web. *It is a tool from 2016.*

It is just a possible way for NCRPs to think about the agency's orientation.

Does your agency have a service focus or a results focus?

Provide these two documents as handout to participants.

The next two slides are just screen shots of the two tools.

Slide 67

Are you results oriented? -- AGENCY SURVEY

Read the statements below. They are "paired" to represent either a service orientation or a results orientation.	<small>Select the one that is MOST like your agency.</small>	
Pick either statement a or b in each pair.	<small>A</small>	<small>B</small>
a. Our agency publicity highlights what we do (the services we provide).		
b. Our agency publicity highlights what was accomplished by the families and communities we serve and does not separate these accomplishments by "department" or "division" of the agency.		
a. Our agency policies and procedures are compliance driven.		
b. Our agency policies and procedures are results driven.		
a. Our agency's strategic plan identifies what each department (or each funding source) will do.		
b. Our agency's strategic plan includes clearly defined outcomes that will be achieved through the work of the entire agency, not just by a department.		

If you have time, you can have participants respond and get a sense if everyone in the room has the same opinion of the agency's orientation.

This is a good place to see if everyone understands the elements in the same way.

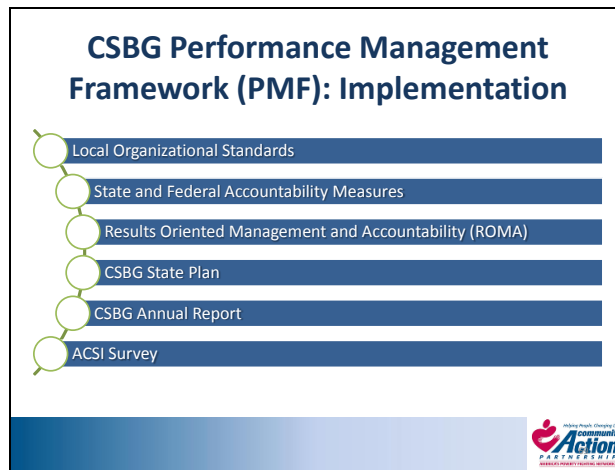

Are you results oriented? -- STAFF SURVEY

Read the statements below. They are "paired" to represent either a service orientation or a results orientation.	Select the one that is MOST like your agency.	
Pick either statement a or b in each pair.	a	b
a. When asked about my job, I primarily talk about what services I do.	<input type="checkbox"/>	<input type="checkbox"/>
b. When asked about my job, I primarily talk about what changed and what was accomplished by the families and communities I serve.	<input type="checkbox"/>	<input type="checkbox"/>
a. I think about my work in terms of applying the rules of funding sources or of the program.	<input type="checkbox"/>	<input type="checkbox"/>
b. I think about my work in term of helping families and communities change for the better.	<input type="checkbox"/>	<input type="checkbox"/>
a. I think of myself as a staff member of a particular department or program of our agency.	<input type="checkbox"/>	<input type="checkbox"/>
b. I think of myself as a staff member of the agency, who is working to improve the lives of people with low income.	<input type="checkbox"/>	<input type="checkbox"/>

Even if the agency demonstrates a specific perspective, it might be in conflict with individual staff perspectives.

This tool can help identified these differences.

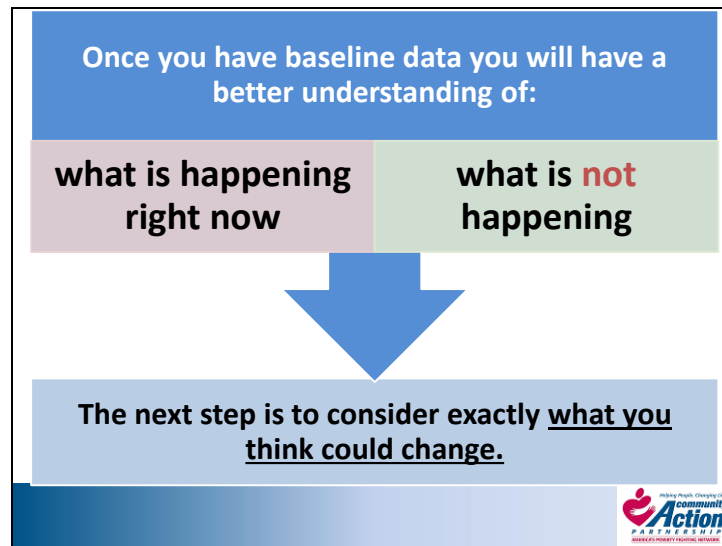

Note to facilitator: Use this as a kind of “bringing together” all of the discussions your group has had to date.

Remember the elements of the Performance Management Framework we introduced at the beginning of the training.

State and Federal Accountability Measures, the CSBG State Plan and the ACSI Survey are the primary responsibility of the State CSBG office and OCS – but they base those activities on data from local CAAs.

We have included reference to the Organizational Standards, ROMA and the Annual Report in the prior discussions, but before you select a topic area to Impact at your agency, take a look at these elements and see if there is anything in the PMF that needs attention. Are there any Organizational Standards areas (as: having to do with human resources or fiscal areas) that should be included in your Plan? Is there anything from the Annual Report that is of specific concern so it should be included?

WRAP UP THIS SECTION with key points:

The tools we provided can lead to more discussion about assessing the organizational culture, as the culture of the organization can impact how change is viewed, implemented, etc. Remember the PMF questions: how well does the agency operate? What difference does the agency make?

It is important to establish a base line so you can identify progress (change) and success.

After assessment we move to planning!!

In Assessment, we have identified areas that we want to IMPACT. Impact Areas are those that we want to maintain/strengthen (if they are successful) or change (if we see opportunities for improvement).

Make sure participants have at least a few impact areas in mind as we turn to the next part of the training.

Identifying a Path

- Help agencies (using their NCRPs) make explicit their personal and agency-identified expectations related to improving implementation of the full ROMA cycle in the Community Action Network.
- Help agencies use ROMA to improve performance and visibility.
 - Some barriers:
 - *Have fear and anxiety about approaching agency change.*
 - *Don't have a "map" (need the steps showing how we could complete something).*
 - *Need to understand both quantitative and qualitative sides of the work*

We know there is resistance to change. Resistance takes many forms and they are a natural part of any change process.

Get some ideas from participants about why this is true.

Here are a couple ideas:

- Fear of the unknown
- Fear of loss of job, security, status
- Depression
- Anxiety
- Anger
- Poor communication
- Lack of clarity, inability to make decisions.

We are introducing two terms to this process:

Scale UP and Scale OUT

- Scaling Up involves building a ROMA Culture in agencies and in the network that produce a supportive environment to embrace a “results orientation” and a performance management framework.
- Scaling Out is a “horizontal” spread of knowledge and principles from peer to peer throughout the entire national community action network.

Scale Up: Recognizing a ROMA Culture

Support Organizational Culture that is Results
Oriented

Embrace a unifying Local Theory of Change
Connect with the National Theory of Change

Why do efforts to initiate organizational change fail?

- No matter the change, no matter the organization, there is one constant that largely determines success or failure – it is the role and importance of organizational culture.
 - Culture shapes behaviors and help individuals understand the organization.
 - Culture is often so strong and so powerful that when there is a discrepancy or inconsistency between the current culture and the objectives of change, the culture will win.

We have discussed movement from a service centric culture to a performance centric culture in our network for at least two decades.

And yet we still hear that ROMA is a burden or too much trouble or at the bottom line is not useful. We hear that the agency only has time to deliver the services to people in need and the rest of the “stuff” that goes into that ROMA thing would take away from the “real work” of the agency.

Recently, newly certified ROMA Implementers have told us that they are not able to put their skills to work at their agency because of two major barriers: 1) they report that the Executive Director does not “buy-in” to the “whole concept”, and 2) they tell us that “no one wants to change.” Well, this isn’t a surprise! Who does want to change – especially if it is something that appears to be working for them just the way it is.

It seems that the idea here is that if the ED would buy-in then the others would have to change. That the person with the ultimate decision making power (the top leader) would just make everyone “use ROMA”.

There are a couple things here that we should consider. What do we mean by “buy in” and do we really believe that a directive from the ED will be all that it takes to make a culture change?

We are not the first network to face the need for Culture Change – so there is a lot of research that we can use to help us move forward.

Everyone recognizes that cultural change within an organization is not easy and certainly not instant.

For this presentation, we have taken some of the ideas “from the field” and worked them into a series of “building blocks” that may help you move your agency forward!

What we hear...	Change to:
<ul style="list-style-type: none">• "ROMA isn't a part of the broad agency culture."<ul style="list-style-type: none">– It may be something CSBG programs talk about, but it's not recognized across the agency.• "There is limited buy in from executive leadership"<ul style="list-style-type: none">– Is it often noted that leadership sees that things are working just fine now – so why change?• "ROMA is just for CSBG so it doesn't impact the rest of the agency"	<ul style="list-style-type: none">• "there's an opportunity to shift our org culture to one of results-orientation"• "we have yet to prove the value of ROMA to the leadership"• "we are able to use ROMA resources to improve the whole agency, not just CSBG funded projects"

Does your agency have a service focus or a results focus? Think about the activity (first thing on day 1) where you had to think about one thing you'd want to share about your agency. Was it the **results** your agency helps to accomplish? Or the services you provide?

Consider the language on this slide.

Think about the importance of how people talk about ROMA and how subtle shifts in language can cause a big change down the road.

Change "Roma isn't part of the org culture" to "there's an opportunity to shift our org culture to one of results-orientation"

Change "the leadership doesn't buy in" to "we have yet to prove the value of ROMA to the leadership"

Change the idea of 'having to do ROMA for the whole agency', we could reframe as "being able to use ROMA resources to improve the whole agency, not just CSBG funded projects"

So, rather to focus on the burden that is placed on the NCRP, see it as an opportunity and a process.

Here is a testimonial from a CAA ED

"I am very familiar with Leadership that won't buy in to ROMA. Because, for years, that was **me**. When I was part of Executive leadership at an agency in Indiana, I just *refused* to embrace ROMA. Oh, I would make sure that the **agency met the minimal requirements for the state and feds**. I sat, glassy-eyed, through more than one ROMA training in the early years of the millennium. Oh, I made sure our IS report was submitted, on-time and accurate. But beyond that, "no thank you"! It is only recently...since taking my current post, becoming a Certified ROMA Trainer, and working with a network of passionate professionals... that I have been converted. (And you know they say *there is no one as zealous as a convert!*) I know how *I* used to be. The one thing that made me turn the corner was the ORGANIZATIONAL STANDARDS. Perhaps the strongest argument for Executives to support ROMA culture is the impact it will have on meeting The Organizational Standards for Community Action Agencies. For me, these mandatory standards convinced me it was time to take ROMA implementation seriously. We got a first glimpse in 2014. In January 2015, Information Memorandum 138 from the Office of Community Services nailed it down. State and agencies were required to measure and report their achievement of the standards starting in 2016. In 2017 the state began monitoring all agencies on whether we are meeting the Organization Standards."

So the REQUIREMENT of Organizational Standards was the key in this example that made the shift in “buy in” at this agency.

But is that enough to really make the change? It was for this Leader.

But for a REQUIREMENT, sometimes all that is needed is a check in the box (in most cases) and that won't move the agency to a “results orientation” culture. What will move the agency to appreciate the value of a ROMA culture?

Well, for sure, the ED/CEO/person at the top must at least acknowledge the requirement to meet Organizational Standards (which have ROMA embedded throughout) - so that can be a foundational buy-in to the whole concept.

But really what is needed is a CHAMPION.

Who is the Champion?

- The person at the top of the agency (ED/CEO)
- Someone from agency leadership (upper management) who has authority
- Anyone else who feels passionate about the anti-poverty work the agency is doing
 - to move individuals and families to economic stability and
 - to support the creation of healthy communities

Consider what is meant by “buy-in.”

-- Literally it means “to make an investment”

If the Leader has agreed to have staff trained as either Nationally Certified ROMA Trainer or Nationally Certified ROMA Implementer that is one kind of investment. *How that person then is supported can be part of building the culture and we will discuss later.*

--It also means “to believe in and support an idea, concept, or system.” – This is more to the point here.

If the Leader does not believe in ROMA that is what is commonly identified as a barrier to culture change.

-- And finally it can mean “to accept an idea as worthwhile.” We think this is a critical part of buy-in, because it is about the value of ROMA as worthwhile to the agency.

It is clear that there is **not just one way to influence organizational cultural change**

In all of the ways that organizational culture change is studied, it is clear **that there needs to be a champion** for the change. Someone who believes the change is not only beneficial, but necessary – and urgently needed.

Often it is believed that the champion must be someone in a leadership position from the top levels of the organization.

If not the Executive Director or CEO, the ROMA champion needs to be part of the Executive Leadership, because the champion will need to have *authority* to make decisions and to direct (or at least support) new behaviors.

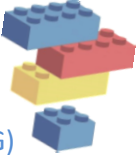

But it is **also true** that the champion can come from within the organization at other levels and the champion can **influence** those in authority and the decisions that are made.

Keep this idea in mind as we talk about the building blocks of a ROMA culture. Be thinking about who the champion is/could be in your agency. Is it you?

So what does it look like when the agency has embraced the move to a results orientation and embraced the concept of performance management?

Building Blocks of a ROMA Culture

1. Recognition of a Results Orientation
2. Broad exposure to Introduction to ROMA
3. Executive Staff and Board acceptance and participation in ROMA and Performance Management
4. Trained staff in trusted position
5. Employing a shared language
6. Includes the whole agency (not just CSBG)
7. Incorporated into existing regular activities

Before you can think about changing a culture, it is important for you to have a clear picture of what the culture should look like when the change has happened. Start with thinking about the result. 😊

These building blocks were created from ideas provided by Jane Hopkins, NCRT in IL, and from the feedback from NCRIs across the country.

In the next section, participants will have an opportunity to consider each building block and compare with the current culture in their agency. Are these building blocks present? Are there other things they see that support a ROMA Culture?

#1. Recognition of Results Orientation and Performance Management

The agency demonstrates ...

- Having a focus on results not services
- Acceptance that agency performance must be identified and improved
- Understanding of ROMA principles
- Value of Performance Management systems (ROMA) as a tool

Provision of services vs strategic thinking?

Here are a couple of the key concepts (on the slide).

In this building block, we have joined the idea of a results orientation with the broader performance management because they go together.

If you are about producing results, you have to know how the results are produced. Who are the participants? What do they need? What actions are needed? What resources are needed? Who are the service providers?

Then, how well did we do? What went well and what needs to be reviewed to find out how to improve it?

These (and many other) questions are answered in the course of the ROMA Cycle.

It is important to believe that the implementation of ROMA is going to improve the agency's performance.

You can probably think of others.

(Get some ideas from participants and put on flip chart)

Being Results Oriented Means Being Data Centric

- Both long term strategic and day-to-day operational decisions should be based on facts that can be sourced back to reliable and accessible data.
 - Is the agency oriented to apply data as a source of actionable insight in support of advocacy, marketing, engagement of stakeholders and the broader focus of the organization?
 - Does the organization value decisions that are supported by verifiable data that is accurate, reliable, timely and complete?

The logo for Action Partnership features a red heart icon to the left of the word "Action" in a bold, sans-serif font. Below "Action" is the word "Partnership" in a smaller, lighter font. To the right of "Action" is the tagline "Making People. Changing Lives." in a small font. Below "Partnership" is the text "A PARTNERSHIP" in a small font, and at the very bottom, "AMERICAN HUMANITARIAN FEDERATION" in a very small font.

This requires a management system that monitors data entry and provides follow up.

The agency has a system and process to store, retrieve and aggregate data so it can be analyzed. Fostering and maintaining a culture that embraces data, and has a data focus (data collection, storage, aggregation, analysis and use) that is integrated into standard operations...not something 'extra' that is done later.

Data must be turned into information to support on-going decision making.

Organizations need to invest not just in data analytics, but across four operational pillars: People, Platforms, Partners, and Processes.

#2. Broad Exposure to Basic ROMA and Performance Management Principles

Assure shared understanding across the whole organization

- Schedule and conduct *Introduction to ROMA* training for all departments
 - Directors, Managers, Supervisors
 - Board Members
 - Direct service staff
- Repeat or expand training as needed to reinforce and refresh knowledge
 - New staff and new board members
 - Staff who have a change in work duties; Board members with new responsibilities.

Start with the **why** - How does it fit? What is the point?

Remember it takes “shared attitudes, values, goals, and practices” to make an organizational culture.

The best way to start a ROMA culture is with the *Introduction to Results Oriented Management and Accountability* curriculum for all departments.

Providing this training is also a financial investment. It involves staff time, materials, possibly lunch, possibly travel.

There are some staff who attended Intro to ROMA training many years ago and so maybe they just need a refresher (could use the Board Training power points available at the partnership web site for these)

But for all new staff and board members, the full one day training provides all of the key concepts of ROMA – on which the entire Performance Management framework is built. Of course this is important for program directors, managers and supervisors – but also for those providing direct services to customers. They need to understand how their work fits into the whole agency mission and goals.

Don't forget to train the BOARD

If you don't have a Nationally Certified ROMA trainer within your organization, there should be someone near you who can come and provide at least annual training. Contact the Association to help you schedule this.

As indicated above there are 7 short power points (about 15 min each) that cover the ROMA basics and are designed for Board members. If your Board meets monthly, you could do one of these each month – if quarterly, take 45 mins to an hour to cover 3 or four sections at each meeting.

Don't consider this a one-and-done.

There are additional training materials available – on topics specifically related to the ROMA Next Generation items (Local Theory of Change, Community Level work, Data Collection and Analysis) and some deeper dives into Community Needs Assessment and Strategic Planning -- that can be used with staff who are engaged in those activities.

#3. Executive Staff and Board Acceptance and Participation

- ED and Board demonstrates Results Orientation and Performance Management principles
 - Organization activities are linked to National Goals
 - Focus is on outcomes not just outputs
 - Actual performance is compared to projections
- ROMA language is part of every Board agenda
 - Frequent reference to the ROMA cycle in reports and discussions
- Assure Executive and Board have training on ROMA

OK – back to “buy in at the top”.
What do you think this looks like??

Yes, the culture will not be sustained if the agency leadership does not understand the value of ROMA principles and practices. And they need to not only give lip service to acceptance of ROMA, but also must actively participate!

Keep in mind the importance of the Leaders – **but don’t just stop here if you do not currently have buy-in.**

Don’t wait for this building block to be in place before moving to the others!!

Your CHAMPION (you?) will be working on the other building blocks at the same time with the end goal of having all the critical buy-in in place at some time!!!

It is important that everyone is clear about what ROMA is and what it is not.

This applies to both Executive Staff AND to the Board of Directors.

Remember that the Board is like the “company” and they are responsible for setting policy and direction of the agency.

They cannot be left out if a ROMA culture is to be created. And they cannot be expected to buy-in without understanding.

So they need both basic introduction to the principles and then on-going reinforcement of how the application of the principles is benefiting the agency.

#4. Trained staff in a trusted position

- Organization has invested in staff member(s) becoming Certified ROMA Professional (NCRP)
 - NCRP is valued and trusted Organization trusts in the expertise that training imparts to that staff person
 - NCRP has assigned duties that include review and input on all aspects of agency planning and implementation of ROMA.
- The agency has staff with expertise, experience, and skills to get the most value out of their data with an emphasis on data analytics.

It implies that organizations have the right expertise, experience, and skills to get the most value out of their data with an emphasis on data analytics.

Are you valued as NCRP? Trusted? Building relationships and trust is YOUR job. You have to earn it. What **can** you do? Who can you influence? Can that person influence others?

The agency should have a least one member of the staff who has been through formal training as either a ROMA Trainer or ROMA Implementer (or both). So in order to do this, the organization will have **to invest** in that training. This is another demonstration of agency/Executive buy-in.

It is important that there be some thought as to how that investment will be put to use once someone has become certified. Whether the person comes from the leadership, management, or front-line staff within the agency, once they earn that ROMA certification, they return with unique knowledge and skills. It is important for the organization to recognize and use that. The organization needs to trust in the expertise that the ROMA training imparts to staff persons who get certified. While they will not be the only person in the agency who understands ROMA (at least not in the long run once the culture is ROMA-tized), they will have some particular focus on the principles. It will be up to them to share their knowledge with other staff – but they should be recognized as having (or having access to) specific knowledge.

It is clear that the NCRP should have a clear direction from administration that will allow them to consult on all aspects of agency planning and implementation. If they are not the ones leading the Community Needs Assessment and Community Action Planning, they could be checking and advising all steps while they pass along their training and understanding to others. The ROMA-trained staff could also review how the plan is being implemented, and if results are being measured in a way that will let the agency for a good evaluation of its results.

Steps needed to make this happen:

Investment for training of NCRP (Trainer or Implementer) at the agency

Access and voice granted to designated/trained staff

See the **NCRI and NCRT Considerations** Documents for ideas about who is the best choice!

#5. Employing a Shared Language

- Become familiar with the terminology of Performance Management, Results Oriented Management and Accountability, Continuous Quality Improvement
- Use terminology consistently (we suggest adapting ROMA terminology)
- Use acronyms carefully

Speaking the Same language

Whether you are talking about a nation, a peoples, or an organization: **Without a shared language there can be no shared culture.** For building a ROMA Culture, we need to consistently use the common ROMA language.

While ROMA is really not much different from other performance management systems, **some terms are used in specific ways** that are somewhat different to how they are typically used.

For example

We talk about “services” as the actions the agency does for individuals and families, and “strategies” that are agency and community level activities.

We talk about Goals (as the National Goals in the Community Action Theory of Change), Outcomes (what is accomplished to meet the goals) and Indicators (how the outcomes are measured). Other systems will include “objectives” but ROMA lets the objectives fall within the local agency action plans.

We make a distinction between *Outcome Indicator* (both Projected and Actual) and *Performance Indicator* because the Performance Indicator can describe measuring both/either the Outcomes (results) and Outputs (the process).

The important take-away here is become fluent in the vocabulary of Results Oriented Management and Accountability so the whole organization can understand the language.

There is a list of terminology and definitions available from the National Association of State Community Service Programs (NASCS) website

By example (and gentle correction if needed), you can move the needle to get everyone understanding and speaking in ROMA terms. (In this, the broad exposure to the *Introduction to ROMA* curriculum across the agency will be very helpful).

One final warning about your ROMA vocabulary – Beware of Acronyms! They can really hinder communication. NPI doesn't mean anything to most people whereas National Performance Indicator might. The same is true for CAP instead of Community Action Plan. Even beware of the acronym "ROMA" and use "Results Oriented Management and Accountability" as often as possible.

#6. Include the Whole Agency

- All program areas are Results-oriented
 - ROMA thinking is not limited to CSBG
- ROMA Cycle is foundational to organization strategic planning.
- ROMA cycle is applicable to all activities in the agency
- Identify results and report performance throughout all programs.
- Create a Local Theory of Change

We often hear that ROMA is just for the CSBG funded activities.

This is a myth that must be overcome if the results oriented culture is to flourish. Your AGENCY needs to be results oriented

“CSBG is only a small portion of our budget” but gives the agency access – not a burden but rather resource.

We need to understand that ROMA is an Organizational Practice and must be foundational for all of the agency activities. The development of an agency Local Theory of Change can help with this building block. As the agency considers what it wants to accomplish as a whole agency (not just what the individual programs will accomplish) everyone can see how the different parts of the agency work together to achieve agency wide results.

Your ROMA Champion may have the challenge of making friends with key staff in every department to share ideas about results orientation and performance management.

Some ideas about how would you reinforce ROMA principles; integrate the values into all aspects of the agency functioning, include:

- Posting values of a “results orientation” in the workplace (via a local theory of change perhaps)
- Recognize people who integrate these values into their everyday work
- Seek out new staff who will support these values
- Include values in recruiting and performance appraisal process

#7. Incorporate ROMA in regular Activities

- Use the Checklist to map out current practices for all areas of the ROMA Cycle in all program (department) areas.
- Adapt Monthly Program Reports
 - Assure all program reports include outcome language
 - Reference National Goals and activities reported by National Performance Indicators (NPI's)

This is probably the most important step, because if the agency (staff) think of ROMA as an **additional task, they are likely to avoid it.**

But if it can be pointed out that the **agency is already doing activities** that are part of ROMA, the chance of acceptance improves dramatically.

The use of the checklist to map out what is happening, who is doing what, etc. will be very helpful.

Including ROMA principles and concepts in their monthly program reports, using the vocabulary of Results Oriented Management and Accountability.

For instance, they aren't saying that "WIC served x number active clients". They are saying that "X number infants and children had health and physical development improved as a result of adequate nutrition"

Program directors also report identify which of the National Goals their program strive for. So the same WIC monthly report told us that their efforts are so **Individuals and families with low incomes are stable and achieve economic security.**

Putting ROMA language and concepts in the monthly report may seem like a small thing, but it has had a huge impact for organizations that have done this.

- It provides ongoing focus on our results.
- It keeps us clearly targeting the National Goals
- It also brings results-orientation consistently in front of the management and the board who receive the reports.

How to Change the Organizational Culture

- **First, assess the current culture.**
- **Then, understand what the changed culture would look like.**
- **Make a plan for change**
 - Implement, reassess, analyze, plan for next steps

In other words, use the ROMA Cycle!!

Identify resources for assessing org culture that are available on the web site.

Include actions you want to take to address barriers identified in your assessment when you create your Impact Pathways Plan.

Remember “how well does the agency operate?” can depend on the organizational culture.

Scale Out:
Everyone Has a Role in ROMA
Implementation
Support Effective Action

To improve agency performance through the implementation of the full ROMA Cycle and the Performance Management Framework

“Improving” is another word for “change” and we all know how difficult change can be.

We want to consider how we can create a **pathway** to the change that will **improve the agency**

Some ideas to consider as we get started:

The starting point for transition is not *the end you have in mind*, but *what will need to end to leave the old situation behind...*

Nothing so undermines organizational change as the failure to think through *who will have to let go of what when change occurs*.

Managing Transitions – Making the Most of Change by William Bridges

Scale Out

- Spread knowledge and principles **from peer to peer** to create a cohesive body of support – tied together by common understanding and the desire to act.

Some Things That Have Worked

- Talk to your peers
- Engage a “planning partner”
- Organize a group of interested people who can discuss and consider actions related to improving agency efficiency and effectiveness.
- Create stories and speculation about the expected impact
- Promote “Knowledge Transfer”

Sharing ROMA

- Consider how you can share key elements of ROMA with peers and colleagues in the agency.
 - New employees
 - Management Teams
 - Board Members
- Connect with people who are champions in the agency.

Various kinds of sharing sessions and training are cited by NCRPs.

One recurring example is “on boarding” of new employees, providing a ROMA orientation as part of the first days on the job.

This “sharing” is also known as “Knowledge Transfer”

Positional and Personal Power

- There are two kinds of power – one that comes from your position in the agency (because of your job, you have authority to make decisions) and the other that comes from your interest and passion about a subject (your personal power)
- Recognize the importance of influence (instead of leadership or authority)
 - Improve your communication skills:
 - conflict management, relationship and trust building
 - reflection, powerful questions, empathy, curiosity
 - Act from humility
 - Join your knowledge with the knowledge of others

Raise the question of the difference between “power” and “authority” – positional power is often about having the authority to make decisions... but how are those decisions carried out?

ROMA implementation is not just for staff who are in positions of power.

Recognize that different views, priorities, realities need to be considered and valued when you are considering power. It is important for ROMA advocates to “lead from where you are” by using your influence and passion.

Consider your role in the agency.

What is in your control? What can you influence? And what is interesting to you?

Thinking about your role

- Is ROMA valued in the organization?
- Do you have tasks and responsibilities related to ROMA implementation?
- How do other professionals/staff in your setting view work related to ROMA?
 - Are you valued for your work with ROMA?
- How do you view your ROMA work?
 - What do you think your contribution is to your agency? *What could it be?*

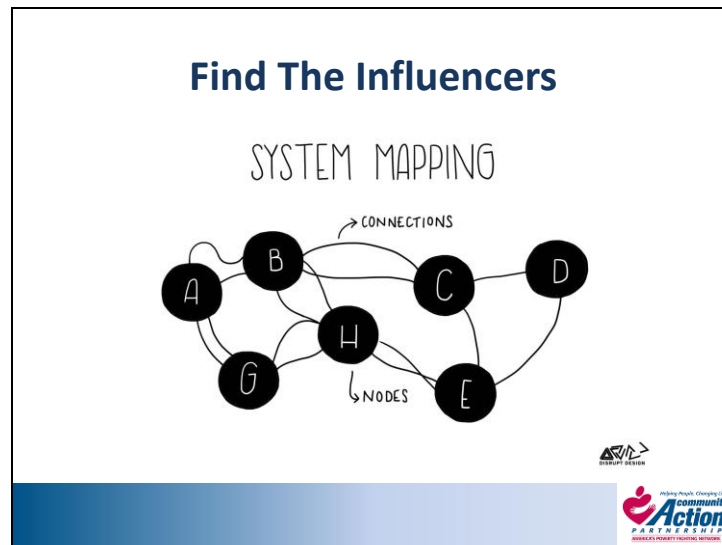

Ask NCRPs in the audience: What does being a Certified ROMA professional mean to you? Are you in a position to be a champion?

Ask workers who are NCRPs to think about their position in the agency using these statements. Ask those who are not NCRPs to think about the statements in relationship to the ROMA implementation tasks they are assigned.

Ask those who not engaged in ROMA work, what IS your role?

Ask EDs if they value the people who are charged with any of the ROMA implementation tasks – and how they show this value

Indicate that this is just to get participants thinking about values, responsibilities and actions.

The behavior of a system is driven by its underlying structure and the relationship between the elements. By constructing an Influence Diagram, those relationships can be identified and documented such that they can be explored with a view to understanding or modifying a system's behavior.

If you are not the ED or have the ED's ear, you will have to find the Influencers in your agency. Who influences the decision makers? Who influences them? How can you get to talk to the people who have influence?

The process for constructing an Influence Diagram:

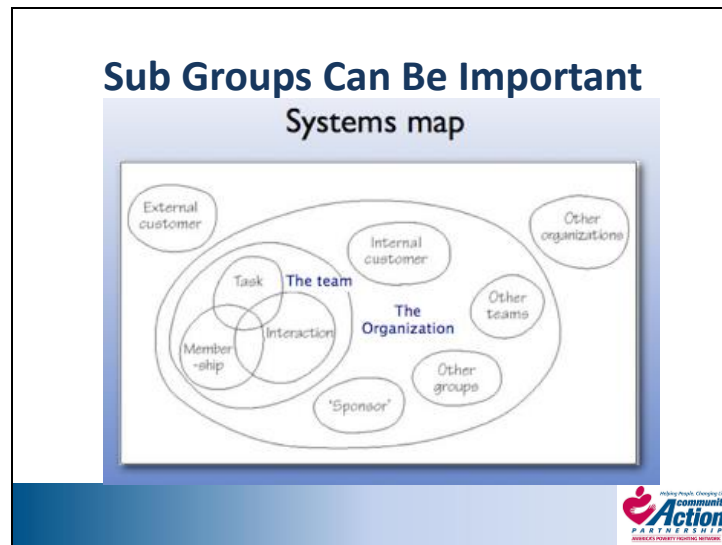

Step 1: Brainstorm all potential elements of the system of interest. An element can be a person and groups of people, a process, equipment or hardware, building and places. Basically anything can be important here!

Step 2: Identify natural groups of elements that have similar/common views/features/aspects. These groups should be given a collective name.

The combination of steps 1 and 2 creates a "Systems Map."

Step 3: Construct the Influence Diagram by identifying and documenting the influences between the various groups in the system. Consider how each system element on the map is related to any other group. The relationships can be physical entities, information and controls flows or less tangible influences.

- Show influences or relationships, including influences that are not tangible. Name the influence.
- Try to avoid influence lines crossing.
- Make sure that the diagram is easy to follow.
- Show the direction of the influence.
- Consider the interrelationships inside a group. Mark them if they seem to be important (see next slide about sub groups)

This just is a way to get you to recognize that your systems map may identify sub groups that are working together – and may have different patterns of behavior than the other sub groups and the agency as a whole.

Some sub groups may have mini-cultures within the organizational culture.

Note to facilitator: don't get lost in the diagram... It is just a graphic to show that some parts of the agency may work together.

It might be different departments that are grouped together.

It is important to know where the support for ROMA lives in these different groups, so you know how to begin to influence them.

-Identify the **IMPACT**
-Understand the **PATHWAY** needed to get to the impact
-Create action steps in your **PLAN**

CREATE A PLAN

Making People. Changing Lives.
Community Action
PARTNERSHIP
SUSTAINING PEOPLE. PROMOTING PROGRESS.

Our goal for NCRPs: Help make explicit their personal and agency-identified expectations related to improving implementation of the full ROMA cycle in the Community Action Network. Our goal for the network: increased capacity to achieve results.

So we believe the use of a Plan will help to **identify the impact** that is going to be seen because of the implementation of this plan.

Once you have identified the baseline, you can then pick something to work on that will have an impact.

Identifying the impact you want to work on will help you move to knowing **what the pathway is** toward that impact!!

But the plan must have clear action steps to make it a reality.

What would be easy?

- What is one thing you identified as a barrier that might be **easy** to change?
- Are there some people/departments that are interested in change, but just don't know how to move forward?
- If they are already moving, it could be easy to help them along!

What impact do you expect to see?

When you identified the baseline, you found things that were “in crisis” or “vulnerable” and you probably identified some things that are “stable” but could be moved into “safe” with just a little bit of attention.

What do you pick to work on first?

One idea is to pick something easy to start with because once you have a “win” it is easier to continue to be successful.

What is critical?

- Is there something that is not happening, or something that is not happening well?
- Something that is an Organizational Standard that is “unmet”?
- Something that you feel you can influence?

The logo for Community Action Partnership is located in the bottom right corner of the slide. It features a red heart icon to the left of the word "Action" in a bold, sans-serif font. Above "Action" is the word "community" in a smaller, lowercase font. Below "Action" is the word "PARTNERSHIP" in a smaller, uppercase font. To the right of "Action" is the tagline "Making People. Changing Lives." in a small font. Below the tagline is the text "COMMUNITY ACTION PARTNERSHIP" in a small font.

You may not make a big change in something that is complex, but you might be able to identify one step forward.

Example: the agency has not done a Community Needs Assessment in more than 5 years and doesn't have a plan to do one now... that will take considerable activity to get moving and to get all of the pieces in place (see separate training about putting together a CNA team and collecting data).

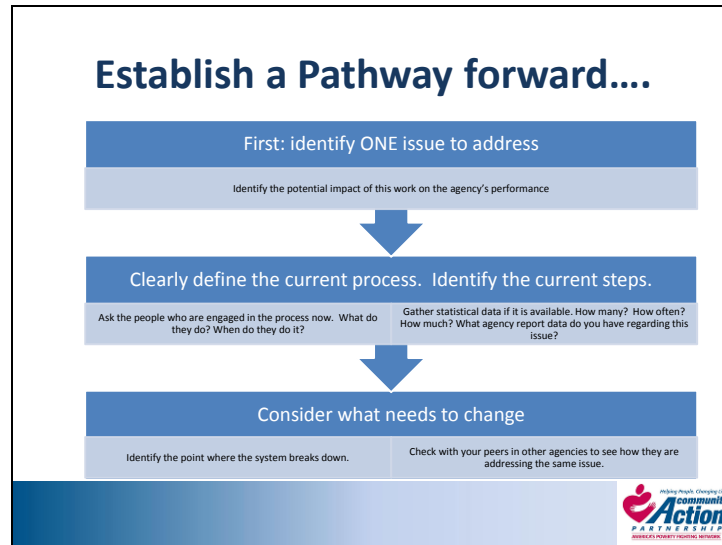

So you can consider one thing you feel you can do to start the movement. Maybe offer to do a training about the CN A.

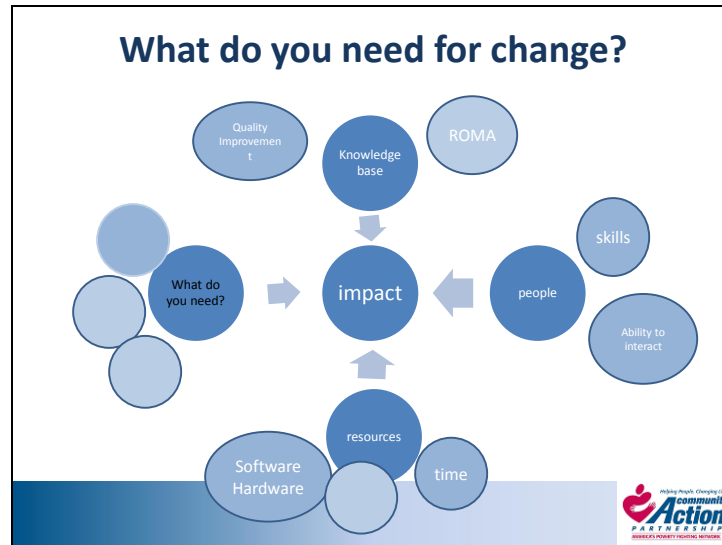

Recognizing what you can and can't do (right now)

- Start with something you CAN change
- Build a win and then you will have success stories to build on
- Is there something happening that is an excellent example of ROMA principles? Something that is already working? How can you promote and celebrate it?

Celebrating something that is working can be a good strategy for creating interest in the full ROMA Cycle.

Don't forget that you need resources to put your plan into action.

These are just some ideas... each of you will have to identify what you need to make an impact!

Example: We do a good job of reporting on outputs but not with reporting on outcomes.

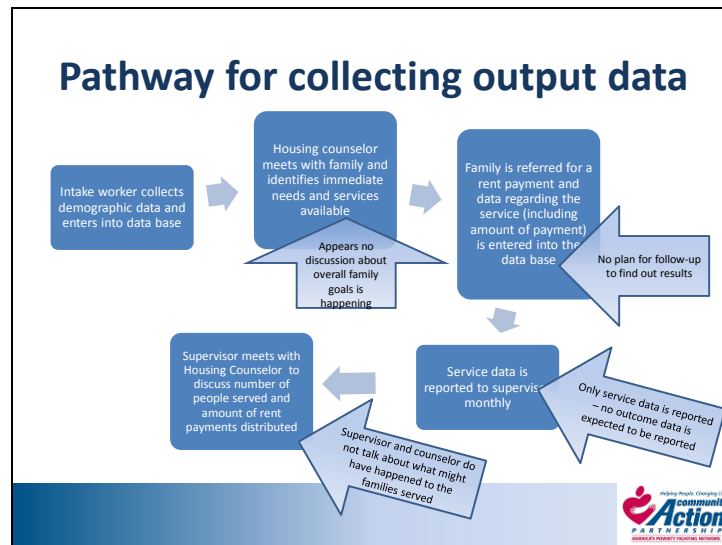

- How is the reporting on outputs structured?
 - Who does it? How often? Measurement tools? How is it collected?
- What is the related outcome? (or outcomes)
 - How would you know if that was achieved?
 - Who would do data collection? How would they measure? How often?
- Identify the point where the system breaks down *or could break down*
 - What is the barrier (time, customer is not available for follow up, tool doesn't provide measure, etc.)?
- What has to happen first to make an impact?
 - What will that open the door for? (and so on.....)
- Establish a pathway to support the establishment of the new action steps.
 - Identify resources you will need (time, people, material, training, etc.)
 - Time frame for you to be engaged in the pathway.

The logo for Community Action Partnership features a red heart icon to the left of the word "Action" in a large, bold, blue font. Above "Action" is the word "community" in a smaller, blue, sans-serif font. Below "Action" is the word "PARTNERSHIP" in a smaller, blue, sans-serif font. At the very bottom of the logo, there is a small line of text: "MAKING PEOPLE CHANGING LIVES".

This is an example of a situation that is commonly identified. Agencies are familiar with counting service units and find that easy to accomplish. But when it comes to observing and documenting outcomes, that can be more difficult.

This slide starts the process of considering the elements of the situation. It starts deconstructing the processes that are at work.

This makes more explicit the processes that are in place (without the arrows) and then (adding the arrows) shows where small changes in process could shift the focus to outcomes in addition to documenting the service.

Consider where a focus on results could be included. (Click to bring in pink arrows)

Slide 108

Action Plan Worksheet				
Broad-Based National Goal:		Objective/Outcome:		
Intervention (Strategy):				
Action Steps (WHAT)	Timeline/Due Date (WHEN)	Staff Responsible (WHO)	Resources (Financial, Facility, Human)	Measurement of Success

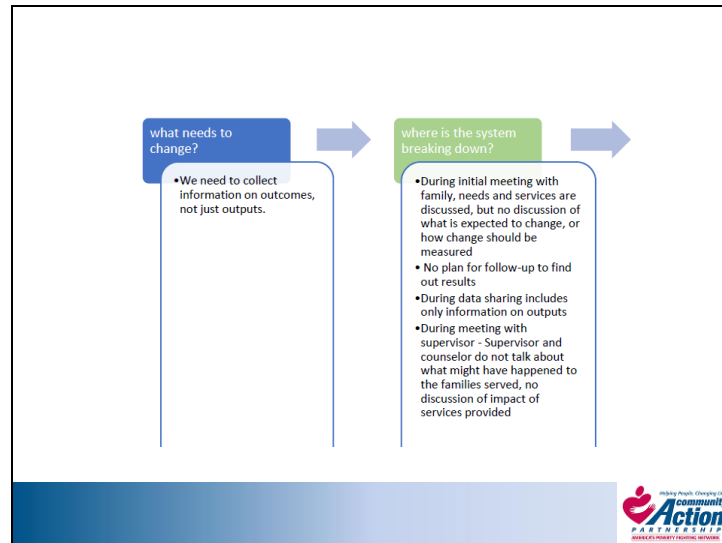

Hand out blank worksheet and get participants to consider the example and identify some action steps that would address the issues in the example provided.

Have them just work on the first four columns. (We will come back to measures of success later.)

After about 5 minutes, ask for some feedback from the participants to see how they are approaching the task.

Then show the next slide, which is how we started to consider what was needed.

We identified the areas that showed us where the process was breaking down. It starts with the initial meeting with the customer, when we are currently just identifying eligibility and referring to a service that is available.

Using this flow chart idea will help to identify what actions need to be taken.

Have the group go back to their work on creating action plan. Give another 5 minutes.

Pathways Plan Worksheet				
Broad Agency Level Goal: Agency has capacity to support results.		Objective/Outcome: Agency is able to identify, document and analyze both outputs and outcomes related to services provided to individuals/families who are homeless or at risk of eviction/foreclosure.		
Intervention (Strategy): Create procedures to assure that focus is on outcome as well as providing a range of housing related services				
Action Steps (WHAT)	Timeline/Due Date (WHEN)	Staff Responsible (WHO)	Resources (Financial, Facility, Human)	Measurement of Success
Step 1: Use expanded interview questions to determine level of need related to housing. Document placement of customer on a housing scale. --Based on placement, identify outcome (change in situation) that would be possible result of the services to be provided. -- Document in case record, both the outcome expected and the service referral.	At time of initial intake with housing counselor.	Intake worker takes initial information from customer, enters into data base Housing Counselor interviews to determine housing status and potential outcomes, enters into data base	Office space for initial intake interview, staff to complete initial intake, staff to complete extended interview (same person?), database to enter case notes,	
Step 2: Create Action Plan with customer. In addition to the service referral, identify expected outcome and a time frame for follow up is established and agreed upon by customer.	Action Plan must be created prior to service delivery. This includes a specific date for follow up.	Housing Counselor and customer will create plan.	Office space for interview, database to enter case notes and Action Plan, staff to complete extended interview, calendar of follow up	
Step 3: Follow up with customer to find out if their housing status has improved. Follow up with community partner (if appropriate) New status is identified on the housing scale to show movement (outcome). Outcome data is reported.	At time agreed upon in creation of action plan	Housing counselor, community partner, or other party as identified in Action Plan	Phone, email or resources to allow for a home visit. Office space if customer is returning to office. Staff to conduct follow up and to enter data Format to report outcomes as well as services	
Step 4: Housing counselor and supervisor meet to discuss customer status -- review services that have been rendered, impact of services, and concerns or barriers to outcomes.	Once a month	Housing Counselor and supervisor	Space to meet	

After sharing some ideas from the participants, you can show this example of first four columns – this takes the things identified on the flow chart and makes the action steps more specific.

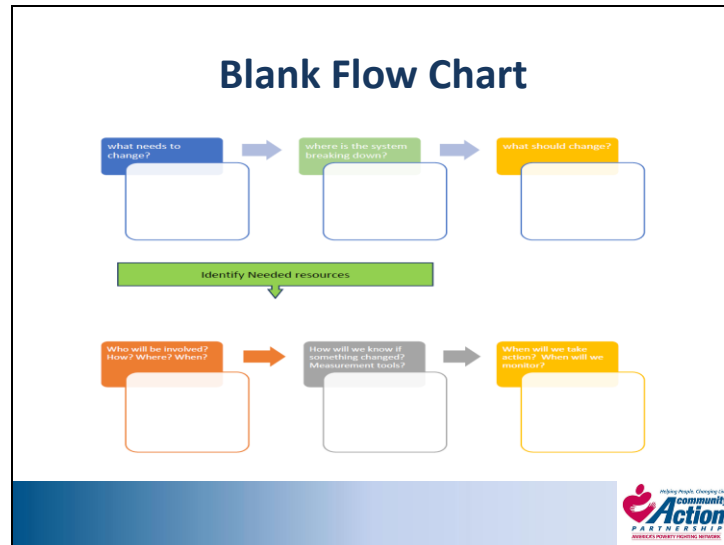

This is where the Plan development for the agency (and for specific staff in the agency) starts!

Ask participants to provide some areas that they have already identified as needing IMPACT work. Write on Flip Chart

Here are some ideas from other agencies:

- Once realizing that you are not integrating the phases of the ROMA cycle, you want to identify how you can improve consideration of performance, improvement and results of new efforts as all part of the same process.
- The plan is not based on what is identified in the community needs assessment. How can this be addressed?
- We need to identify measurement tools and practices to track impact (at both family and community levels)
- Without the data, you can't do analysis – so what is needed to strengthen data collection processes – what supports are needed at the level of direct service workers who are entering the data? How can supervisors be engaged?
- Who is doing the analysis (in addition to reporting) of the data? How can this be shared/improved?
- How can data be better used to inform decision making?

This is an example of a flow chart that can be used to identify action points. Provide this as a hand out to participants.

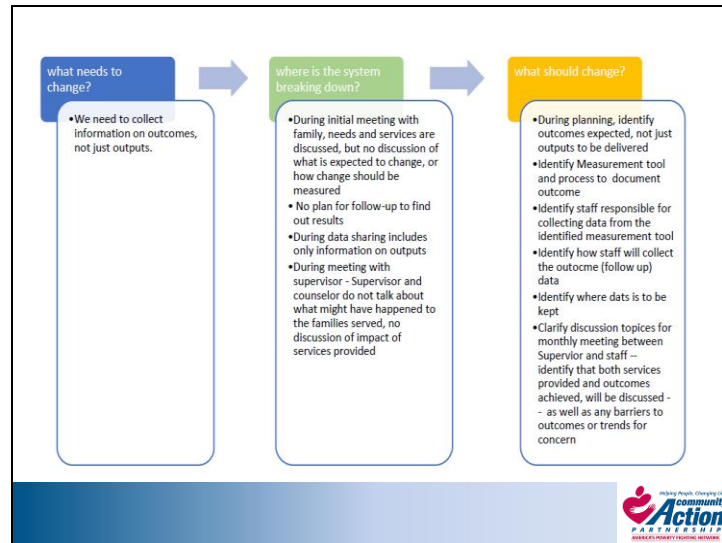

Include Indicators in your Plan

- Your Impact Pathways Plan will not only include steps and time frame, but will also include “indicators” of success.
- How will you know you are making progress?
- What do you expect to see change that you can **measure**?

There is a column in the action plan handout about measures of success.
Use this time to brainstorm measurement tools.
How will you know if any change happens?

Example with measurement processes identified – this isn't just about the measurement tools, but also about who will do it and what happens to the data from the tool.

Pathways Plan Worksheet				
Broad Agency Level Goal: Agency has capacity to support results.		Objective/Outcome: Agency is able to identify, document and analyze both outputs and outcomes related to services provided to Individuals who are homeless or at risk of eviction/foreclosure.		
Intervention (Strategy): Create procedures to assure that focus is on outcome as well as providing a range of housing related services				
Action Steps (WHAT)	Timeline/Due Date (WHEN)	Staff Responsible (WHO)	Resources (Financial, Facility, Human)	Measurement of Success
Step 1: Use expanded interview questions to determine level of need related to housing. Document placement of customer on a housing scale. -Based on placement, identify outcome (change in situation) that would be possible result of the services to be provided. - Document in case record, both the outcome expected and the service referral.	At time of initial intake with housing counselor.	Intake worker takes initial information from customer, enters into data base Housing Counselor interviews to determine housing status and potential outcomes, enters into data base	Office space for initial intake interview, staff to complete initial intake, staff to complete extended interview (same person?), database to enter case notes,	Copy of Housing Scale that reflects customer's current housing status and expected outcome.
Step 2: Create Action Plan with customer. In addition to the service referral, identify expected outcome and a time frame for follow up is established and agreed upon by customer.	Action Plan must be created prior to service delivery. This includes a specific date for follow up.	Housing Counselor and customer will create plan.	Office space for interview, database to enter case notes and Action Plan, staff to complete extended interview, calendar of follow up	Completed Action Plan.
Step 3: Follow Up with customer to find out if their housing status has improved. Follow up with community partner (if appropriate) New status is identified on the housing scale to show movement (outcome). Outcome data is reported.	At time agreed upon in creation of action plan.	Housing counselor, community partner, or other party as identified in Action Plan	Phone, email or resources to allow for a home visit. Office space if customer is returning to office. Staff to conduct follow up and to enter data Format to report outcomes as well as services	Report from customer (include showing rent receipts, mortgage payments, etc.), recorded on Housing Scale - reflects customer's revised housing status and notes if outcome was achieved.
Step 4: Housing counselor and supervisor meet to discuss customer status -- review services that have been rendered, impact of services, and concerns or barriers to outcomes.	Once a month	Housing Counselor and supervisor	Space to meet	Housing counselor documents meeting with supervisor in case notes. Supervisor keeps log of meeting with housing counselor with details on what was discussed.

Example with measurement tools identified

Use a Scorecard to Follow Progress

ROMA Cycle	ROMA Action Item	(date	(date	(date	(date	Comments
		June 2018	Dec. 2018	June 2019	Dec. 2019	
Mission	Documentation that current Mission statement has been reviewed within the past 5 years.	Yellow	Green	Green		
Local TOC	Evidence that the mission statement is used in guiding the agency's decisions and actions.	Green	Green	Green		
	If the agency has a Local Theory of Change, evidence of how it is used in decision making, communications, etc.	Red	Red	Yellow		agency does not have local TOC
Assessment	Identifies the community being assessed	Green	Green	Green		
	The Community Needs Assessment includes a variety of data from reliable sources:					
	Quantitative Data	Green	Green	Green		
	Qualitative Data	Green	Green	Green		
	Customer input about their needs and the community needs	Green	Green	Green		
	Customer Satisfaction Data	Green	Green	Green		
	Resources (in the community)	Yellow	Yellow	Yellow		
	Agency Report Date	Yellow	Yellow	Yellow		
	Identifies the population in need	Red	Red	Red		
	The needs are identified as family, agency, and community levels	Red	Red	Red		
The needs are prioritized using _____ technique						
Identifies the involvement of the Board of Directors						

This is a simple way to track progress.....

You will need to identify what measurement processes you will use to identify movement from yellow to green to red.
 Or from “in crisis” to “thriving”

Some General Trends to Monitor

These are things the network is talking about:

- ❖ Using ROMA cycle to consider performance, improvement and results of new efforts
- ❖ Identifying measurement tools to track impact at both family and community levels
- ❖ Strengthen data collection and analysis (in addition to just using data for reporting)
- ❖ Using data to inform decision making

The logo for Community Action Partnership features a red heart icon to the left of the word "Action" in a large, bold, blue font. Above "Action" is the word "community" in a smaller, blue, sans-serif font. Below "Action" is the text "PARTNERSHIP" in a small, blue, sans-serif font. At the very bottom of the logo, there is a small line of text: "MAKING PEOPLE CHANGING LIVES".

This slide starts the Training Wrap Up.

Stepping back from the specific planning process we just discussed, let's look at some general trends that are happening across the country.

Are any of these happening in your agency? How could these ideas be put into your Impact Pathways Plan?

What else is important to you as you move towards improved Performance Management?
Quality of staff?
Access to unrestricted funds to meet needs?
Others?

Get feedback from the participants!

What did they learn? What do they plan to work on next?

What else do they need to know about?

What other training topics?

What else do you need to know?

- Will my organization do all of this?
- Considering how much we are already doing, what needs to happen to improve?
- Who will take the lead? Who is responsible?

Who is your champion?

So what can YOU do?

What is the first thing you will do?

Will you use the ROMA checklist to determine your agency's current practices?

Other steps?

We have provided the ROMA Audit Checklist as a way to help you assess what is currently being done to implement ROMA.

And given you some examples of how to create a plan for a pathway to impacting change in your agency identified some “building blocks” that could be useful as you consider a strategy to improve a ROMA culture, and suggested using a scorecard to follow your progress toward change.

What will you do?
