LET'S FILL OUT THE CENSUS!

COUNT ALL KIDS & BABIES

EVERYONE COUNTS!

Children and babies should be included on your 2020 Census form -- and not just kids related to you, but *any* kids living at your address! When babies and children are included, the programs that support them -- like schools, childcare, healthcare, and public transportation--get the funding they need throughout their childhood.

WHO SHOULD YOU INCLUDE ON YOUR FORM?

My stepson's toddler who lives with me full-time.

Include her. Even though you don't have custody and she's not your blood relative, she lives in your home, so you should include her on your Census form.

My cousin and her 5 year old son are living with me, but only temporarily.

Include them. If they have no permanent address and are living with you, you should count them.

My friend has been living with me for 6 months and she had a baby in March 2020.

I**nclude them.** As long as the baby was born by April 1, 2020, include them, even if they're still in the hospital when you fill out the Census.

My foster children, both under the age of 3.

Include them. Foster kids count too!

My daughter, but I share custody of her with her father.

It depends. Your daughter should be included on the Census of whichever home she spends the most time in. If you split custody 50/50, count her in the household where she stayed on April 1, 2020. Talk to her father to make sure she is only counted once!

My daughter's two best friends who sleep over every Saturday.

Do *not* include them. You shouldn't include anyone who doesn't actually live in your home.
